WHY CHOOSE MEDSTATION?

Why sign into a long-term lease with tenant improvements when you can pay year to year and expand as needed? Often times a commercial lease has a minimum of five to ten years commitment. Additionally, out of pocket tenant improvements can greatly increase upfront costs. Once you agree that MedStation is a good fit for your practice, you are able to move in immediately. As MedStation expands to other locations, your practice is able to expand with us. This allows you to acquire a larger patient base and provide more convenient locations for your existing patients. MedStation also provides flexibility not only in your location but also which days of the week you practice, and the number of exam rooms out of which you work.
