274 Shoemaker Rd - A Rare Industrial Opportunity

274 Shoemaker Rd represents a rare opportunity for a single-tenant manufacturing or industrial user to occupy one of the region's premier large-scale facilities and one of the best large-format warehouse/manufacturing buildings currently available in the market. Offering $\pm 146,000$ SF on more than 11 acres, the property combines irreplaceable site improvements, flexible zoning, and a well-maintained infrastructure package that is increasingly difficult to find in today's industrial environment. Buildings of this scale, functionality, and condition rarely become available, particularly for single-user occupancy, and this asset has remained under the same long-term ownership while not being offered to the market for more than 15 years.

Strategically located in Pottstown, the property benefits from immediate access to Route 100 and US-422, regional bus and public transportation routes, and within close proximity to Pennsylvania's major transportation arteries including I-76 (PA Turnpike), I-476, I-78, and I-81, providing efficient connectivity throughout the Northeast and Mid-Atlantic regions. Within a 500-mile radius lies approximately 45% of the U.S. population, 60% of the Canadian population, four of the nation's nine major markets, 45% of U.S. manufacturers, and 41% of domestic traded service industries—making the location highly advantageous for manufacturing, logistics, and distribution operations.

Pottstown continues to emerge as a highly attractive industrial location due to its strong regional workforce, lower operating costs, and central accessibility throughout Southeastern Pennsylvania. Drawing labor from Montgomery, Chester, and Berks Counties, the area provides a deep and diverse workforce suited for manufacturing, fabrication, warehousing, logistics, and technical operations. Combined with access to regional intermodal connectivity, nearby air freight hubs, and the ports of Philadelphia, Baltimore, and New York, 274 Shoemaker Road offers tenants a unique combination of scale, infrastructure, labor access, and long-term strategic value in one of the region's most supply-constrained industrial markets
