

# THE BLUE RIDGE CONNECTOR

## NORTHEAST GEORGIA INLAND PORT

The proposed 104 Acre Northeast Georgia Inland Port will offer a direct connection to the Port of Savannah through Norfolk Southern. With a maximum capacity of 150,000 container lifts annually, the facility will eliminate 600 roundtrip highway miles for each container moved by rail. This new inland port terminal will streamline the supply chain for numerous manufacturers, processors, and distributors across the region.

### SERVICE & CONNECTIVITY

- Operated by Norfolk Southern.
- Direct rail connection between Northeast Georgia and the Port of Savannah, the second most interconnected port in the nation, with 37 direct container services.
- Located strategically east of the railroad tracks along White Sulphur Road, near its intersection with Cagle Road, the site is poised to reshape the region's logistical infrastructure.
- Provides immediate access to I-985.
- Located less than 20 miles from I-85.

### CAPACITY

- Annual container lift capacity of 200,000.
- 18,000 feet of operational track, capable of handling six 10,000-foot trains simultaneously.

### EFFICIENCY

- The inland port model allows containers to be trucked shorter distances and staged at the intermodal yard, where they are transferred onto trains carrying hundreds of containers in one trip.
- Alleviates congestion on Georgia highways by eliminating the 600-mile roundtrip truck journey to and from the Port of Savannah.
- Lowers transportation costs for manufacturers across the region.
- Will serve existing port customers and attract new investment, acting as a source of economic development in the state.
