

# 4831 Main St, Alix, AB

Main Floor Exterior Area 4587.50 sq ft  
Interior Area 4124.40 sq ft

PREPARED: 2025/12/04

# 4831 Main St, Alix, AB

## Property Details

### Room Measurements

Only major rooms are listed. Some listed rooms may be excluded from total interior floor area (e.g. garage). Room dimensions are largest length and width; parts of room may be smaller. Room area is not always equal to product of length and width.

#### Main Building

##### MAIN FLOOR

Commercial: 34'1" x 60' | 2008 sq ft

Commercial: 23'9" x 23'2" | 503 sq ft

Commercial: 25'9" x 29'8" | 722 sq ft

Entry: 13'4" x 7'11" | 106 sq ft

Office: 13'4" x 14'9" | 197 sq ft

Storage: 10'6" x 12'11" | 136 sq ft

Utility: 11'3" x 15'8" | 177 sq ft

Washroom: 5'3" x 4'11" | 23 sq ft

### Floor Area Information

Floor areas include footprint area of interior walls. All displayed floor areas are rounded to two decimal places. Total area is computed before rounding and may not equal to sum of displayed floor areas.

#### Main Building

##### MAIN FLOOR

Interior Area: 4124.40 sq ft

Perimeter Wall Thickness: 20.1 in

Exterior Area: 4587.50 sq ft

#### Total Above Grade Floor Area, Main Building

Interior Area: 4124.40 sq ft

Exterior Area: 4587.50 sq ft

Customer Name: Patrick Galesloot

Customer Company: Century 21 Advantage

Prepared: Dec 4, 2025

This property was measured by Paul Howard Photography.

RMS size is the Total Above Grade Floor Area.

Use Main Building EXTERIOR Area for detached, semi-detached, and townhouse properties' RMS.

Use Main Building INTERIOR Area for apartment style condominium RMS. Exterior Area is shown for information comparison only.

Measurement diagrams are available as part of the downloadable PDF floor plans.

All measurements and calculations are done in accordance with the Residential Measurement Standard (RMS) as provided by the Real Estate Council of Alberta (RECA). For more information please contact your Measuring Associate or visit [www.reca.ca](http://www.reca.ca).

## iGUIDE Method of Measurement

### Definitions

**Interior Area** is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

**Excluded Area** is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

**Exterior Wall Footprint** is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

**Exterior Area** is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

**Grade** is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

**Total Interior Area** is the sum of all Interior Areas.

**Total Excluded Area** is the sum of all Excluded Areas.

**Total Exterior Area** is the sum of all Exterior Areas.

**Finished Area** is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

**Unfinished Area** is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

### Notes

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

### Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.

### PDF Floor Plans

**A. RECA RMS 2024:** Color is used to indicate all included areas. Excluded and not reported areas are shown in white. Walls are always shown in black.

**B. ANSI Z765 2021:** Color is used to indicate all finished areas. Unfinished and not reported areas are shown in white. Walls are always shown in black.
