EXECUTIVE SUMMARY

This report presents the findings of a Phase I Environmental Site Assessment (ESA) performed on the Subject Property addressed at 6 West Front Street in Battle Mountain, Lander County, Nevada. McGinley & Associates, Inc. (McGinley) conducted this investigation for the purpose of identifying recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), and/or controlled recognized environmental conditions (CRECs) on the Subject Property in accordance with the 2021 ASTM International standard practice for the performance of Phase I Environmental Site Assessments (ASTM E 1527-21). The U.S. Environmental Protection Agency (EPA) has endorsed this practice as satisfying the requirements of All Appropriate Inquiry (AAI). McGinley performed this work for the Nevada Department of Conservation and Natural Resources, Division of Environmental Protection, on behalf of Lander County Convention and Tourism Authority (User) as part of the State of Nevada Brownfields Program (NBP). Any exceptions to, or deletions from, this practice are described in Section 10 of this report.

General Findings:

- The Subject Property is comprised of approximately 0.24 acres of land developed with the historic Lemaire Building, which was constructed in 1866, and formerly operated as a mercantile, grocery store, various retailers, and a local meeting place. By 2004, the building was vacated.*
- At the time of the site reconnaissance, the Subject Property was unoccupied. The building interior included a former restaurant area, retail area, deli counter, storage areas, and two walk-in coolers/freezers on the first floor. The second floor was formerly used as residential quarters consisting of four bedrooms, two bathrooms, a kitchen area, and living area.*
- Several floor drains were observed on the first floor of the building. Visual indications of staining or other releases to the floor drain were not observed. Limited quantities of household cleaning agents were observed within storage areas of the Subject Property. Indications of staining or releases from these materials were not observed.*
- The exterior of the Subject Property generally consisted of a concrete-surfaced parking lot. De minimis staining was observed in the parking lot which appears to be a result of drips from parked vehicles.*
- The Subject Property was not identified as a record in the databases searched by EDR, and NDEP records were not identified regarding potential environmental concerns.*
- The north-adjointing property historically operated as a gasoline station and automotive repair shop. Records documenting these operations, such as environmental sampling reports or inspection records, were not identified. This distance is within the default critical distance of 30 feet for potential vapor migration. Therefore, a potential vapor encroachment condition (VEC) cannot be ruled out for the Subject Property.*

Recognized Environmental Conditions (RECs):

- No RECs were identified in connection with the Subject Property.*

Historical Recognized Environmental Conditions (HRECs):

- No HRECs were identified in connection with the Subject Property.*

Controlled Recognized Environmental Conditions (CRECs):

- No CRECs were identified in connection with the Subject Property.*

Business Environmental Risks (BERs):

- Based on the age of the structure, building materials may include the presence of lead-based paints, asbestos-containing materials (ACM), and/or microbial growth.*

Conclusions

Upon conclusion of our Phase I ESA, and based on the information reviewed, this assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the Subject Property.

Based on the information reviewed for this assessment, McGinley is of the opinion that prior to any renovation, demolition, or other disturbance activities impacting building materials on the Subject Property, a comprehensive hazardous building materials survey should be performed by a certified professional.

1.0 INTRODUCTION

1.1 Purpose

This report presents the findings of a Phase I Environmental Site Assessment (ESA) performed on the property addressed at 6 West Front Street in Battle Mountain, Lander County, Nevada, and hereafter referred to as the Subject Property. McGinley & Associates, Inc. (McGinley) conducted this investigation for the purpose of identifying recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), and/or controlled recognized environmental conditions (CRECs) on the Subject Property in accordance with the 2021 ASTM International standard practice for the performance of Phase I Environmental Site Assessments (ASTM E 1527-21). The U.S. Environmental Protection Agency (EPA) has endorsed this practice as satisfying the requirements of All Appropriate Inquiry (AAI).

As defined in ASTM E 1527-21, the term **REC** means (1) the presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the Subject Property under conditions that pose a material threat of a future release to the environment. The term REC is not intended to include *de minimis* conditions which are conditions related to a release that generally do not present a threat to human health or the environment and which generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

A **HREC** is a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities (to current regulatory standards) without subjecting the Subject Property any controls. A HREC will not be considered a REC per ASTM E 1527-21.

A **CREC** is a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (i.e., activity and use limitations or other property use limitations).

1.2 Scope of Work

The scope of work performed, and procedures utilized included the following tasks:

- Subject Property reconnaissance and observation of adjoining properties and vicinity by a qualified person under the direct supervision of an Environmental Professional (EP);
- Environmental and physical setting review to assess geologic, hydrogeologic, hydrologic and topographic characteristics of the Subject Property, and to determine potential pathways for the migration of contaminants including solids and liquids at the surface or subsurface, and vapor in the subsurface;
- Review of Subject Property history/land use through city directory listings, historical aerial photographs, historical topographic maps, fire insurance maps (if ascertainable), local jurisdiction records, and personal interviews/questionnaires;
- Review of regulatory agency records to identify and assess any listings of regulatory permits, registrations, or enforcement actions at the Subject Property, adjoining properties, or proximal sites (if necessary), through both a commercial database search and agency inquiries;
- Interview with the User to obtain various User-required information about the Subject Property as required under the ASTM standard and the AAI rule;
- Interviews with the Owner and Various Agencies to ascertain past and current uses of the Subject Property, adjoining properties or the surrounding area which may provide information about the Subject Property history and assist in identifying RECs, HRECs and CRECs;
- Preparation of this report that describes all work performed and presents a discussion of the findings and conclusions.

1.3 Conditions of Contract

McGinley performed this work for the Nevada Department of Conservation and Natural Resources, Division of Environmental Protection, on behalf of Lander County Convention and Tourism Authority (User) as part of the State of Nevada Brownfields Program (NBP) pursuant to our proposal dated February 10, 2023 and agreed upon through a Scope of Work Approval task letter dated February 10, 2023. The NBP task number for this project under Contract DEP22-001 is MA25-23. It is our understanding that this Phase I ESA was conducted as an environmental due diligence effort in connection with Brownfields funding and prospective redevelopment.

1.4 Significant Assumptions

This Phase I ESA was conducted in accordance with the assumptions and limitations contained within ASTM Standard Practice for Environmental Site Assessments - Phase I Environmental Site Assessment Process, ASTM E1527-21.

As stated in ASTM E1527-21 Section 4.5.1, no environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a Subject Property. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a Subject Property and recognizes reasonable limits of time and cost.

Additionally, portions of this Phase I ESA are based on unverified information supplied to McGinley by third-party sources. In accordance with ASTM E1527-21 Section 7.5.2.1, an Environmental Professional (EP) is not required to verify independently the information provided by third-party sources, unless the EP has actual knowledge that the information is incorrect, or unless it is obvious that certain information is incorrect based on other information obtained in the Phase I ESA.

1.5 Special Terms and Conditions

The findings of this Phase I ESA are based on the completeness and accuracy of the data and observed conditions of the Subject Property as of the indicated Subject Property reconnaissance date, and when publicly available information was obtained as described in this report.

1.6 User Responsibilities

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must complete an AAI compliant user questionnaire and provide it to the environmental professional. Failure to complete this User Questionnaire could result in a determination that "all appropriate inquiry" is not complete. The questionnaire determines a baseline of User knowledge of the Subject Property regarding the following items:

1. Environmental cleanup liens that are filed or recorded against the Subject Property (40 CFR 312.25);
2. Activity and land use limitations that are in place on the site or have been filed or recorded in a registry (40 CFR 312.26);
3. Specialized knowledge or experience of the person seeking to qualify for the LLP related to the Subject Property or nearby properties (40 CFR 312.28);
4. Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR 312.29);
5. Commonly known or reasonably ascertainable information about the Subject Property (40 CFR 312.30); and
6. The presence or likely presence of contamination in, on, or at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

In order to obtain this information, an AAI compliant User Questionnaire was provided to the User of this Phase I ESA. Additional information regarding User Questionnaire and User Requirements is included in Section 3.0. The completed User Questionnaire can be found in the User Questionnaire Appendix.

1.7 User Reliance

This report is an instrument of service prepared by McGinley for the exclusive use of Lander County Convention and Tourism Authority. No party other than Lander County Convention and Tourism Authority is permitted by McGinley to rely on this instrument. With the permission of Lander County Convention and Tourism Authority, McGinley will meet with a third party to help identify the additional services required, if any, to permit such third party to rely on the information contained in this report, but only to the same extent of Lander County Convention and Tourism Authority reliance, and subject to the same contractual, technological, and other limitations to which Lander County Convention and Tourism Authority has agreed. The findings of this Phase I ESA are based on the completeness and accuracy of the data and observed conditions of the Subject Property as of the indicated property reconnaissance date, and when publicly available information was obtained as described in this report. Lander County Convention and Tourism Authority has agreed to the General Conditions in the signed proposal.

1.8 Critical Dates - Continued Viability of ESA

Due to changing environmental regulatory conditions and potential on-site or adjacent activities occurring after this Phase I ESA, the User may not presume the continuing applicability to the Subject Property of the conclusions in this assessment for more than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction is presumed to be valid. If within this period the assessment will be used by a User different from the User for whom the assessment was originally prepared, the subsequent User must also satisfy the User's Responsibilities. An environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction may be used provided that the following components of the inquiries were conducted or updated within 180 days of the date of purchase or the date of the intended transaction.

Phase I ESA Component	Date
Date of Declaration by the Environmental Professional for the Assessment or Update	March 22, 2023
Earliest Date of Interviews with Owners, Operators, and Occupants	March 14, 2023
Date of Federal, State, and Local Records Review	February 21, 2023
Date of Site Reconnaissance of the Subject Property and Adjoining Properties	March 14, 2023
Report Viability Date	September 18, 2023

1.9 Limitations

The findings and recommendations presented in this Phase I ESA report are based solely upon the site conditions, information, and supporting data obtained and reviewed through Client-authorized Scope of Work, as presented in McGinley's technical proposal. This information is subject to change over time and McGinley cannot represent site conditions beyond those specifically identified through the authorized Scope of Work. McGinley makes no warranties, express or implied, with regard to professional services, associated findings, or third-party information used in connection with this project. There were no environmental samples collected as a part of this Phase I ESA. Without specific cause to speculate or discount third-party information, we assume this information remains accurate and reliable for Phase I ESA determinations and related land use planning. Some of the information included in this report was obtained from outside sources, including government agencies and database services.

Information furnished to McGinley in the interviews/questionnaires is taken as true and correct; McGinley is not responsible for inaccurate information furnished by others.

2.0 ENVIRONMENTAL/PHYSICAL SETTING

2.1 Subject Property Location and Description

The Subject Property consists of approximately 0.24 acres of land developed with the historic Lemaire Building. The Subject Property location and property boundaries are included in Figures 1 and 2. The table below summarizes the key information regarding the Subject Property description.

Physical Address	6 West Front Street
Acreage	0.24
Lot/Parcel Description	002-078-02
Public Land Survey System	Section 17, Township 32 North, Range 45 East
Current Ownership	Lander County Convention & Tourism
Current Use	General Commercial
Building Description and Property Improvements	10,618 square foot historic Lemaire Building constructed in 1866 which is currently vacant
Zoning	Commercial District

2.2 Regional Physiographic Setting

The Subject Property is located within the Basin and Range Physiographic Province at an elevation of approximately 4,510 feet above mean sea level. The climate of the region is described as Mid-Latitude Steppe, which is characterized by cold winters, hot summers, and semi-arid precipitation conditions (Houghton et. al., 1975). Historical average minimum and maximum annual temperatures for the area, as recorded at the nearest climate station in Battle Mountain, Nevada, are 32.7 and 67.1 degrees Fahrenheit, respectively, while historical annual precipitation and snowfall averages 6.30 and 10.2 inches, respectively (Western Regional Climate Center, 2016).

2.3 Geologic Conditions

The geology underlying the Subject Property has been mapped as Quarternary floodplain deposits. The deposit is characterized by flat featureless surfaces overlain by a mantle of eolian silt and minor sand ranging from 10 cm to one m thick (House, et. al., 2001). The surficial soils found at the Subject Property have been mapped as the Argenta fine sandy loam. The unit is classified as hydrologic soil group C, which is characterized by moderately high runoff potential when thoroughly wet as water transmission through the soil is somewhat restricted (NRCS, 2016).

2.4 Surface Water Conditions

There are no surface water bodies located on the Subject Property. The nearest major surface water body to the Subject Property is the Reese River, which is located approximately one mile northeast of the Subject Property. According to the Federal Emergency Management Agency (FEMA), the Subject Property is located within a 100-year flood zone and is listed as being in Zone AE, which is characterized as flood hazard areas for which base flood elevations have determined to be approximately 4,514 to 4,515 feet above mean sea level.

2.5 Groundwater Conditions

Based on a review of Nevada Division of Water Resources (NDWR) Well Log Database, groundwater wells do not appear to be located on the Subject Property. Groundwater wells were not observed or reported to be located on the Subject Property during site reconnaissance. Groundwater flow direction at the Subject Property may vary but is estimated to be generally towards the northeast based on topography. The depth to groundwater is estimated to be

approximately five to 35 feet below ground surface (bgs), based on a review of well logs from the surrounding area

3.0 USER PROVIDED INFORMATION

3.1 General

The ASTM Standard defines a User as "the party seeking to use Practice E 1527 to complete an environmental site assessment. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager." The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E 1527-21.

A User Questionnaire was supplied to a representative of the User on February 21, 2023 by McGinley. A copy of the completed User Questionnaire is included in User Questionnaire Appendix.

3.2 Reason for Performing Phase I ESA

McGinley was contracted to perform this Phase I ESA to evaluate the potential presence of environmental contamination on the Subject Property. Lander County Convention and Tourism Authority will incorporate this information into its plans to reuse/redevelop the Subject Property.

3.3 Title Records

McGinley did not contract with a secondary vendor to acquire a chain-of-title for the subject property, nor was one provided by the User to McGinley during this assessment. Chain-of-title records typically contain information regarding historical Subject Property ownership. Therefore, McGinley did not review chain-of-title information during this assessment.

3.4 Environmental Liens or Activity and Use Limitations

Information was not provided to McGinley pertaining to potential environmental liens or activity and use limitations associated within the Subject Property. Information pertaining to potential environmental liens or activity and use limitations on the Subject Property that are filed or recorded under federal, tribal, state or local laws was not supplied by the User. Please note that an environmental liens or activity and use limitations search using a third-party vendor was not performed for the Subject Property. In accordance with ASTM E1527-21, it is the responsibility of the User of this report to confirm that there are not environmental liens or activity and use limitations filed for the Subject Property. In the event that environmental liens or activity and use limitations are identified, please contact McGinley for further evaluation.

4.0 SUBJECT PROPERTY HISTORY AND HISTORICAL LAND USE

A historical assessment of the Subject Property, adjoining properties and surrounding area was performed through a search and review of available historical resources including aerial photographs, topographic maps, Sanborn fire insurance maps, city directory records, and county records. The purpose of the historical assessment was to identify previous land uses of the Subject Property, adjoining properties and surrounding area that may have impacted the Subject Property in the past. A summary of our historical assessment is presented in following sections of this report.

4.1 Historical Aerial Photographs, Topographic Maps and Fire Insurance Maps

Environmental Data Resources, Inc. (EDR) was contracted to provide available historical aerial photographs, topographic maps, Sanborn fire insurance maps and City Directories covering the vicinity of the Subject Property. To obtain information regarding the history of development on and near the Subject Property, the following resources were reviewed, and a summary of findings is presented in the table below. A copy of the historical aerial photographs, topographic maps, fire insurance maps, and city directories that were reviewed are provided in the Historical Aerial Photographs, Topographic Maps, Sanborn Maps and City Directories Appendix. It should be noted that the EDR documents reference 80 West Front Street, the north-adjointing address. A Phase I ESA was conducted for 80 West Front Street concurrently with the Subject Property Phase I ESA. To be cost efficient, only one EDR report was ordered to cover both properties.

Source Reviewed	Date(s)
Aerial Photographs	1954*, 1966*, 1975*, 1983, 1994, 1999*, 2006, 2010, 2015, and 2019 *Subject Property and/or vicinity detail not depicted or discernible due to scale or image quality
Historical Topographic Maps	1957, 1985, 2015, and 2018
Sanborn Maps	1885, 1890, 1897, 1907, 1927, 1943, and 1952

Direction	Description
Subject Property:	Lemaire Grocery Store and attached warehouse (1885); dwelling added on to warehouse (1890); several storage areas added on (1907-1927); dwelling converted to a restaurant (1943-2019).
Northwest:	Residence with outbuildings developed in the eastern portion (1885); two residence and several outbuildings replace initial residence (1890); two aboveground tanks (unknown contents) depicted in the southeastern portion of the site (1897); additional residences and a corral developed to the northwest (1907); central portion of the property is redeveloped as a gasoline station (1927); motel developed along the southwestern edge of the property, additional fueling area and canopy developed in the northern portion of the property (1943-1966); gasoline station in the central portion of the property is no longer present, structure developed in the northern portion of the site, east of the motel (1983-1994); structure in the northern portion of the site is removed (2006-2010); all structures demolished (2015-present).
Southeast:	South Broad Street with two dwellings and a saloon beyond (1885); dwellings removed by 1890; soda bottling facility constructed in western portion of the property (1890-1897); structures on eastern portion expanded and connected (1907); structures on eastern portion of the property removed by 1983 (1983-2019)
Northeast:	West Front Street with railroad, and associated depot beyond (1890-1983); depot building removed by 1994, frontage road developed (1994-2019)
Southwest:	Two dwellings onsite and an artesian well (1885); various outbuildings constructed (1890-1943); southern dwelling expanded (1952-2019)

4.2 City Directories

Environmental Data Resources, Inc. (EDR) was contracted to provide available historical city directory information for the Subject Property and adjoining properties. At the request of McGinley, EDR searched city directory listings for West Front Street and South Humboldt Street. City directory listings as provided by the EDR Digital Archives were searched for the years: 1992, 1995, 2000, 2005, 2010, 2014, and 2017. The Subject Property was identified as the Lemaire Store from 1992 through 1995. The Subject Property addresses were not identified in the other directory years reviewed. Adjoining property listings appear to have included various residences, professional services, retailers, and gas stations. A copy of the EDR City Directory report that was reviewed is provided in the City Directories Appendix.

4.3 County Assessor's Office

According to the Lander County Assessor's Office, the Subject Property is identified as Assessor Parcel Number (APN) 002-078-02. The land use code of the Subject Property is *General Commercial* and the zoning code is *Commercial District*. The Subject Property's acreage is listed as 0.24 acres. The build date of the 10,618 square foot general store building is 1886. The Subject Property is also listed as improved with storage, canopy, patio cover, stairs, and signs. The current property owner is Lander County Convention & Tourism, which has owned the property since 2021. Previous property owners listed include: Bhakta Family Trust (2014-2021), Steven Penn (2013-2014), Silver Bee, Inc (2004-2013), Frederick Fabian (2004), Gary & Gena L Beam (2002-2004), Pedro & Martha Coscarart (2000-2002), and Mary L Sisson & Pete Coscarart (1995-2000). Ownership records prior to 1995 were not provided in the information available for review. Additional information is contained in the Assessors Map and Parcel Information Appendix.

4.4 Previous ESA Activities

Previous ESA or other environmental reports prepared for the Subject Property were not provided by the User and were not identified in the public records reviewed within the scope of this report.

5.0 RECORDS REVIEW

A regulatory agency review was conducted through both a commercial database search and local agency inquiries. The purpose of the records review is to obtain and review records that may preclude recognized environmental conditions in connection with the Subject Property. Accuracy and completeness of record information varies among information sources, including governmental sources, and may be inaccurate or incomplete. Standard sources that are reasonably ascertainable were reviewed by McGinley for this Phase I ESA.

Environmental Data Resources, Inc. (EDR) was contracted to provide records from federal, state, tribal, and local environmental databases for regulatory sites located within the Approximate Minimum Search Distances as specified in ASTM E 1527-21. It should be noted that the federal Resource Conservation and Recovery Act (RCRA) generators and state/tribal registered storage tanks databases were searched within a 0.25 mile Approximate Minimum Search Distance which includes the Subject Property and adjoining properties. A copy of the EDR Radius Map Report is included herein as the EDR Radius Map Report Appendix. Included within the report are summaries of the regulatory databases reviewed, a listing of sites identified within the search radius, detailed data on the identified sites, and maps showing the locations of facilities reported to have had regulatory action.

McGinley also reviewed the "unmappable" (commonly referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence but are potentially in the general area of the property, based on the partial street address, city, or zip code. Any unmappable site that was identified by McGinley as being within the approximate minimum search distance from the Subject Property, based on the site reconnaissance and/or cross-referencing to mapped listings is included in the discussion within this section.

Detailed information for selected sites is provided in the following section, along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the Subject Property.

Database	Target Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted
NPL	Not listed	1	0	0	0	0	NR	0
Proposed NPL	Not listed	1	0	0	0	0	NR	0
NPL LIENS	Not listed	1	0	0	0	0	NR	0

NR - Not Requested at this Search Distance

The Subject Property was not identified as a record in the databases searched by EDR. The northwestern adjoining property was identified as an underground storage tank (UST) site and historic automotive and gasoline service station by EDR. The information provided by EDR is summarized in the following sections. Records for the northwest adjoining property were reviewed to identify potential impacts to the Subject Property, see Section 5.1.

The remaining sites identified in the EDR Radius Map Report were reviewed and were not researched further because they are considered unlikely to have caused environmental impacts to the Subject Property. The sites appear to be located at a distance and/or direction that are not likely to impact the Subject Property; are at locations that are considered likely to be hydrologically downgradient from, or cross gradient to, the Subject Property; have had no reported releases; have had no reported violations of hazardous waste regulations; have received regulatory closure; and/or were not identified as a standard environmental record per ASTM.

5.1 Nevada Division of Environmental Protection (NDEP)

The regulatory agency review identified one regulatory site administered by the NDEP that could potentially impact the Subject Property. Information obtained from the NDEP is provided below.

Name	Uptown Texaco Service and Motel/Lemaire Ford Service - Facility ID 5-000242
Address	80 West Front Street
Distance and Direction	Northwest adjoining
Hydrologic Position	Crossgradient
Databases Listed	- UST - EDR Historical Automotive
Discussion	The information provided by EDR indicated that the Subject Property was listed as a historic gasoline service station and automotive repair shop. Based on the Sanborn maps and aerial photographs reviewed in Section 4.1 of this report, the gasoline station was originally developed in the central portion of the property beginning in the 1920s. By the mid-1940s, an additional fueling area and canopy were developed in the northern portion of the site associated with the automotive repair shop. According to the NDEP files reviewed, the Subject Property was equipped with five USTs including three 1,000-gallon gasoline USTs, one 500-gallon UST, and one UST of unknown size and contents. As of August 1, 1990, the four gasoline USTs were listed as permanently closed by filling with inert material. The status of the fifth UST was not indicated in the files reviewed. Records pertaining to environmental sampling or potential releases from the USTs were not identified in the files reviewed.

5.2 Lander County Building Department (LCBD)

On February 22, 2023, an inquiry regarding inspections, complaints, spills, USTs, or other potential environmental issues in connection with the Subject Property was submitted via electronic mail to the Lander County Building Department (LCBD). On February 23, 2023, LCBD personnel replied by email indicating that their office did not identify responsive records related to environmental concerns for the Subject Property.

5.3 Vapor Encroachment Screening

McGinley conducted a Vapor Encroachment Screen (VES) screening in accordance with the 2015 ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E 2600-15). The VES investigation used available information and professional judgment to derive conclusions. The goal of the VES investigation was to identify the potential for vapors from hazardous substances and petroleum releases to reach the Subject Property. ASTM E2600-15 defines the term, vapor encroachment condition (VEC) as the presence or likely presence of chemical of concern (COC) vapors in the vadose zone of the Subject Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Subject Property as identified by Tier 1 or Tier 2 procedures. McGinley performed a VES investigation for the area encompassing the Subject Property by reviewing each of the regulatory sites that were provided by EDR within a 1/3-mile primary search radius from the boundary of the Subject Property. Other information is contained in the EDR Vapor Encroachment Screen Appendix.

5.3.1 Tier 1 Screening

Initially, 32 site listings were identified by EDR within the 1/3-mile primary search radius surrounding the Subject Property. Of these initial 32 sites, 31 were excluded because they were determined to be outside the area of concern for vapor migration based on distance, estimated hydrologic gradient, and chemical of concern (COC); were not identified as a *standard environmental record* within the default approximate minimum search distance per ASTM; were determined to have limited potential for the presence of COCs; and/or were determined to be beyond the critical distance for vapor migration to the Subject Property per ASTM. For the remaining sites located north-adjointing to the Subject Property, a Tier 2 Screening was performed.

5.3.2 Tier 2 Screening

According to the information reviewed in Sections 4.0 and 5.0 of this report the north-adjointing property historically operated as a gasoline station and automotive repair shop. Records documenting these operations, such as environmental sampling reports or inspection records, were not identified. This distance is within the default critical distance of 30 feet for potential vapor migration. Therefore, a potential VEC cannot be ruled out for the Subject Property.

6.0 SITE RECONNAISSANCE

6.1 Subject Property Description and Current Use

The Subject Property is comprised of approximately 0.24 acres of land developed with the historic Lemaire Building. The property is accessed from the southeast via Broad Street and the northwest via Front Street. Utilities supplied to the Subject Property consist of electric power (NV Energy), natural gas (Southwest Gas), water and sewer (Battle Mountain Water & Sewer).

6.2 Methodology

The reconnaissance included walking the accessible portions of the Subject Property and the Subject Property perimeter. This visual observation of the Subject Property focused primarily on its surface features. Adjoining properties were observed from curbside or property boundaries. The purpose was to evaluate the current conditions of the Subject Property and to obtain information indicating the likelihood of identifying RECs in connection with the Subject Property. Photographs taken during the site reconnaissance are provided in the Photographs Appendix.

Inspectors	Andrew Tkach
Site Reconnaissance Date/Time	March 14, 2023
Weather Conditions	Cloudy and cold
Assessment Site Contact/Title	Paula Tomera, Executive Director, Lander County Convention & Tourism Authority
Limitations Encountered	None

6.3 Observations During Reconnaissance

Please refer to the Site Reconnaissance Summary Table below for observations made by the inspector during the reconnaissance.

Item	Yes/No/Suspected
Potable Water Supply/Source	Yes
Sewage Disposal System	Yes
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No
Storage Tanks (Includes aboveground storage tanks, or underground storage tanks, vent pipes, fill pipes, or access ways indicating underground storage tanks at the subject property)	No
Strong, Pungent, or Noxious Odors/Source	No
Drums, Totes, and Intermediate Bulk Containers	No
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances of Petroleum Products	No
Hazardous Substances and Petroleum Products Containers Not in Connection With Identified Uses	No
Unidentified Substance Containers	No
Polychlorinated Biphenyls (PCB)-Containing Items (Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs. Fluorescent light ballasts, caulk, paint, or other materials that may contain PCBs, and are located inside and are part of the building or structure, are outside the scope of this assessment)	No

Item	Yes/No/Suspected
Heating/Cooling Systems (The means of heating and cooling the building(s) on the subject property, including the fuel source)	Yes
Stains or Corrosion on Floors, Walls, or Ceilings (except for staining from water)	No
Drains and Sumps	Yes
Pits, Ponds, or Lagoons (manmade or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products)	No
Stained Soil or Pavement	Yes
Stressed Vegetation (from something other than insufficient water)	No
Solid Waste (Areas that are apparently graded by non-natural causes (or filled with fill of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal; and mounds or depressions suggesting trash or other solid waste disposal)	No
Waste/Wastewater (Wastewater or other liquid (including stormwater) discharged from or to the subject property)	No
Wells (including dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells)	No
Septic Systems or Cesspools	No
Other Notable Features	No

At the time of the site reconnaissance, the Subject Property consisted of a historical two-story building and included a former restaurant area, retail area, deli counter, storage areas, and two walk-in coolers/freezers. The second floor was formerly used as residential quarters and consisting of four bedrooms, two bathrooms, a kitchen area, and living area. Wall-mounted, natural gas fueled heaters were observed in the interior of the building. The building was unoccupied at the time of site reconnaissance. Several drains were observed throughout the first floor. No staining or evidence of releases of hazardous materials was observed during site reconnaissance. Small quantities of household cleaners were observed throughout the residential quarters. Evidence of significant staining or releases from these materials was not observed and the containers appeared to generally be in good condition.

The exterior of the Subject Property generally consisted of a concrete-surfaced parking lot. *De minimis* staining was observed in the parking lot which appears to be a result of drips from parked vehicles.

6.4 Adjoining Properties

During the site reconnaissance, properties adjoining the Subject Property were observed from the Subject Property boundaries, without being entered, or from curbside, for possible sources of impacts or environmental impairment which could migrate to the Subject Property via surface water runoff, groundwater transport, or other pathways. The Subject Property is bordered by the following:

Direction	Description
Northeast	Unimproved roadway and railroad
Southeast	Owl Motel
Southwest	Carwash and residences
Northwest	Vacant land

Reconnaissance of the publicly accessible portions of the properties located immediately adjoining to the Subject Property did not reveal visible evidence of environmental concerns that could potentially impact the Subject Property.

7.0 INTERVIEWS

7.1 Owner Interview

An owner questionnaire was submitted to a representative of the current Subject Property owner by McGinley on February 21, 2023. The questionnaire was completed by Ms Paula Tomera who is identified as Executive Director of the Lander County Convention & Tourism Authority, the current owner of the Subject Property. The questionnaire was intended to gather information from the current owner regarding the past uses of the Subject Property and its adjoining properties. The environmental questionnaire appears to indicate the representative was aware of the historical gas station and auto shop on the northwest adjoining property. The completed environmental questionnaire can be found in Interview Documentation Appendix.

8.0 FINDINGS AND OPINIONS

8.1 General Findings

- The Subject Property is comprised of approximately 0.24 acres of land developed with the historic Lemaire Building, which was constructed in 1866, and formerly operated as a mercantile grocery store, various retailers, and a local meeting place. By 2004, the building was vacated.
- At the time of the site reconnaissance, the Subject Property was unoccupied. The building interior included a former restaurant area, store area, deli counter, storage areas, and two walk-in coolers/freezers on the first floor. The second floor was formerly used as residential quarters consisting of four bedrooms, two bathrooms, a kitchen area, and living area.
- Several floor drains were observed on the first floor of the building. Visual indications of staining or other releases to the floor drain were not observed. Limited quantities of household cleaning agents were observed within storage areas of the Subject Property. Indications of staining or releases from these materials were not observed.
- The exterior of the Subject Property generally consisted of a concrete-surfaced parking lot. *De minimis* staining was observed in the parking lot which appears to be a result of drips from parked vehicles.
- The Subject Property was not identified as a record in the databases searched by EDR, and NDEP records were not identified regarding potential environmental concerns.

8.2 Recognized Environmental Conditions

No RECS were identified in connection with the Subject Property.

8.3 Historical Recognized Environmental Conditions

No HRECs were identified in connection with the Subject Property.

8.4 Controlled Recognized Environmental Conditions

No CRECs were identified in connection with the Subject Property.

8.5 Data Gaps

As defined in ASTM E1527-21 a data gap is "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." The following data gaps were encountered during the course of this Phase I ESA:

- Historical aerial photographs were not available prior to 1948. However, McGinley believes that this data gap is not considered significant since it is likely that agricultural land was the first developed use of the Subject Property.
- Historical information found for the Subject Property may have exceeded five-year intervals. However, McGinley believes that this data gap is not considered significant as the specific use of the property and adjoining properties appears unchanged during the period of time that exceeded five years.
- Past owners were not available within reasonable time and/or cost constraints for interview for this report. However, based on information obtained from EDR and the NDEP, this data gap is not considered significant since it is likely all information obtained would be duplicative of information obtained from other sources.

Per the ASTM standard, these data gaps are not considered significant and do not affect the findings of this Phase I ESA report.

9.0 CONCLUSIONS

McGinley has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property addressed at 6 West Front Street in Battle Mountain, Lander County, Nevada. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report.

This assessment has revealed no RECs, HRECs, CRECs, or significant data gaps in connection with the Subject Property. The following BER was identified:

- BER: Based on the age of the structure, building materials may include the presence of lead-based paints, asbestos-containing materials (ACM), and/or microbial growth.

Based on the information reviewed for this assessment, McGinley is of the opinion that prior to any renovation, demolition, or other disturbance activities impacting building materials on the Subject Property, a comprehensive hazardous building materials survey should be performed by a certified professional.

The conclusions presented above are based upon the agreed scope of work outlined in the above report. McGinley makes no warranties or guarantees as to the accuracy or completeness of information obtained from others. It is possible that information exists beyond the scope of this investigation. Additional information, which is not available to McGinley at the time of writing the report, may result in a modification of the conclusions and recommendations presented. The services performed by McGinley have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. This report is not a legal opinion, but may under certain circumstances be prepared at the direction of counsel, may be in anticipation of litigation, and may be classified as an attorney-client communication or as an attorney work product.

This report has been prepared for the sole use of the addressee(s) of this report, and cannot be released without consent from McGinley. If a third party relies on the information provided in this report, McGinley accepts no responsibility for damages suffered by the third party as a result of reliance of information contained in this report, and that nothing contained in this report shall create a contractual relationship or cause the third party to bring suit against McGinley.

10.0 DEVIATIONS

McGinley has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice. To the best of our knowledge, there have not been deviations from the ASTM E1527-21 standard.

11.0 OUT OF SCOPE SERVICES

No other services beyond the Phase I ESA were authorized by the User (or client) as part of this assessment and none were conducted. Additional services can be provided upon request at an additional fee.

12.0 QUALIFICATIONS

Resumes of the EPs and personnel who performed this Phase I ESA of the Subject Property are included in the Resumes Appendix.

13.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312; and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted:
McGinley & Associates, Inc.

User Questionnaire

USER QUESTIONNAIRE

Property Address: 6 West Front Street, APN 002-078-02, Battle Mountain, Lander County, NV

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *User* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

The “*User*,” as defined by the ASTM 1527-21 Standard Practice for Environmental Site Assessments, is “the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.” The User has specific obligations for completing a successful application of this practice, which includes, but is not limited, to the following:

(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25).

To meet the requirements of 40 CFR 312.20 and 312.25, a search for the existence of environmental liens and activity use limitations (AULs) that are filed or recorded against the property must be conducted. Environmental liens and AULs are legally distinct instruments and have very different purposes and both can commonly be found within recorded land title records (e.g County Recorder/Registry of Deeds). Any environmental liens and AULs known to the User should be reported to the environmental professional. The User should engage a title company, real estate attorney, or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens and AULs currently recorded against or relating to the property.

Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state, or local law?

Note 1- In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

NO. Not to our knowledge

(2.) Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 above) identify any AULs, such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state, or local law?

NO. Not to our knowledge.

Initials: PT

USER QUESTIONNAIRE

Property Address: 6 West Front Street, APN 002-078-02, Battle Mountain, Lander County, NV

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No, we do not have any specialized knowledge in chemicals or processes used historically.

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Yes, We purchased the property at fair market value.

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the *property*?

The property downstairs historically has been used as a mercantile, a grocery store, shoe store, dress shop, turquoise shop and as a deli. The upstairs was used as a meeting place for the Masons, Eastern Star Womens group and Womens suffrage meeting place. They also held dance& piano recitals, community dances and get

together.
(b.) Do you know of specific chemicals that are present or once were present at the *property*?

No, We are not aware of any chemicals that were used on the property.

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

No. We are not aware of any chemical releases that took place historically on the property.

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

NO. We are not aware of any clean ups on this property.

Initials: PT

USER QUESTIONNAIRE

Property Address: 6 West Front Street, APN 002-078-02, Battle Mountain, Lander County, NV

(6.) The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?

NO. We are not aware of any releases or contamination at the property.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by McGinley Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/03/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/02/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Next Scheduled EDR Contact: 03/06/2023
Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Conservation and Natural Resources in Nevada.

Date of Government Version: N/A	Source: Department of Conservation and Natural Resources
Date Data Arrived at EDR: 07/01/2013	Telephone: N/A
Date Made Active in Reports: 12/26/2013	Last EDR Contact: 06/01/2012
Number of Days to Update: 178	Next Scheduled EDR Contact: N/A
	Data Release Frequency: Varies

COUNTY RECORDS

WASHOE COUNTY:

UST - WASHOE: Underground Storage Tank in Washoe County

A listing of underground storage tank sites located in Washoe County.

Date of Government Version: 08/03/2020	Source: Washoe County Department of Environmental Health
Date Data Arrived at EDR: 08/05/2020	Telephone: 775-328-2493
Date Made Active in Reports: 08/11/2020	Last EDR Contact: 02/15/2023
Number of Days to Update: 6	Next Scheduled EDR Contact: 06/05/2023
	Data Release Frequency: No Update Planned

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BRN093.001
80 WEST FRONT STREET
BATTLE MOUNTAIN, NV 89820

TARGET PROPERTY COORDINATES

Latitude (North):	40.642478 - 40° 38' 32.92"
Longitude (West):	116.935593 - 116° 56' 8.13"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	505446.0
UTM Y (Meters):	4498860.5
Elevation:	4510 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11901894 BATTLE MOUNTAIN, NV
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
32015C0470G	FEMA FIRM Flood data

32015C0465G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BATTLE MOUNTAIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Argenta

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 99 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9 Min: 7.9
2	7 inches	44 inches	stratified fine sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9 Min: 7.9
3	44 inches	59 inches	gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 9 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Wendane

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 99 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 9.6 Min: 7.9
2	12 inches	27 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 9.6 Min: 7.9
3	27 inches	64 inches	stratified silt loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 9.6 Min: 7.9

Soil Map ID: 3

Soil Component Name: Wendane

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Natural Heritage Program

Telephone: 775-684-2900

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

ENVIRONMENTAL OWNER QUESTIONNAIRE

Site Address: 80 West Front Street, APN 002-078-01, Battle Mountain, Lander County, NV

	QUESTION: IF "YES" IS ANSWERED, PLEASE PROVIDE A WRITTEN EXPLANATION IN THE SPACE BELOW THE QUESTION.	ANSWER
1.	Is the <i>property</i> or any <i>adjoining property</i> used for an industrial use? None Known NNoOType text here	Yes No Unknown
2.	To the best of your knowledge, has the <i>property</i> or any <i>adjoining property</i> been used for an industrial use in the past? None Known.	Yes No Unknown
3.	Is the <i>property</i> or any <i>adjoining property</i> used as a gas station, automotive repair facility, commercial printing facility, dry cleaning facility, photo developing laboratory, junkyard or landfill, or waste treatment, storage, disposal, processing, or recycling facility? The parcel next to the store historically was used for a gas staion & auto center	Yes No Unknown
4.	To the best of your knowledge has the <i>property</i> or any <i>adjoining property</i> been used as a gas station, automotive repair facility, commercial printing facility, dry cleaning facility, photo developing laboratory, junkyard or landfill, or waste treatment, storage, disposal, processing, or recycling facility in the past? Yes. The property next to the building historically was used at one time as a gas staion & automotive service station.	Yes No Unknown
5.	Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automobile or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility? No. Not to our knowledge.	Yes No Unknown
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial <i>drums</i> (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility? No not to our knowledge.	Yes No Unknown

Resumes

Andrew Tkach

Staff Engineer

Professional Experience

Andrew Tkach is a staff engineer with seven years of academic and professional experience in engineering and environmental consulting. His responsibilities and experience include groundwater monitoring and sampling, facilitation of hydrologic testing, oversight of environmental drilling, soil sampling, asbestos consulting, data compilation, and technical report writing.

Education

- B.S., Civil Engineering, University of Nevada, Reno, 2019.

Certifications

- Asbestos Abatement Consultant Trainee, NV Lic. No. IM-2273 (Inspector and Project Monitor)

Project Experience

Groundwater and Surface Water Monitoring/Sampling

- **Spring Valley, Nevada** – Responsible for assisting in groundwater and surface water monitoring. Monitoring activities included installing and maintaining dataloggers, collecting parameters from wells and surface water features, collecting water samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, and data assimilation.
- **Jarbidge, Nevada** – Responsible for assisting in surface water monitoring conducted on behalf of a global mining client during their mineral exploration. This work was part of a multi-year long contract to support exploration in an active mining district. Monitoring activities and responsibilities included collecting parameters from surface water features, collecting water samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, data assimilation, and technical report writing. Many of the sampling sites for this project were located in remote locations that required expedition by foot to access water features.
- **Dixie Valley, Nevada** – Responsible for conducting field activities related to surface water monitoring. Monitoring activities included collecting parameters from an artesian well and surface water features, collecting water samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, data assimilation, technical report writing, and training field staff.

Drilling Oversight

- **Tuscarora, Nevada** – Responsible for assisting in the drilling of a test well on a mine site. Oversight activities included logging and classifying soil, collecting soil and water samples, ensuring that the well was being constructed to the required specifications, and monitoring

subsequent pumping test.

- **Silver Springs, Nevada** – Responsible for assisting in the drilling of a production well for the Nevada Department of Transportation. Oversight activities included ensuring that the well was being constructed to the required specifications, monitoring zone pumping tests, and collecting water samples.
- **Roseville, California** – Responsible for assisting in the drilling of a municipal production well for a residential development. Oversight activities included ensuring that the well was being constructed to the required specifications, monitoring zone pumping tests, and collecting Title 22 Water Quality samples.

Phase I Environmental Site Assessments (ESAs)

- **Various Sites in Nevada** – Responsible for conducting Phase I ESAs. Phase I ESA activities included assessing undeveloped and vacant lands, gasoline and automotive service stations, residential properties, and office/retail sites. Projects have included coordination with city, county, state, and federal agencies, as well as property owners, land managers, tenants/occupants, and other parties. Assessments conducted following accepted consulting practices and in accordance with applicable ASTM International Standards 1527 or 2247, the EPA's All Appropriate Inquiry (AAI) ruling, and individual client scopes including Vapor Encroachment Screening and Business Environmental Risks evaluation for asbestos, lead paint, radon, and mold.

Phase II ESAs

- **Steamboat Hills, NV** – Responsible for conducting soil sampling and technical report writing for a residential development. Phase II ESA activities included overseeing excavation efforts from contractors, collecting soil samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, data assimilation, and technical report writing.
- **Dayton, NV** – Responsible for conducting soil sampling and soil characterization on a property located within an operable unit of the Carson River Mercury Site (CRMS), site prior to development. The CRMS is one of two National Priority Listed sites within the State of Nevada. Sampling activities were conducted to assess for impacts to soil from mercury. Phase II ESA activities included training field staff on safety protocols when working around possible mercury contamination, screening soil for mercury prior to sampling, collecting soil samples following standard operating procedures, record keeping and chain-of-custody management, and sample preparation for delivery or shipment to the laboratory.
- **Northern Reno, NV** – Responsible for conducting soil sampling and technical report writing in support of a Phase II ESA. The Phase II ESA activities included soil screening and sampling following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, data assimilation, and technical report writing.

Asbestos Sampling and Air Monitoring

- **Downtown Reno, NV** – Responsible for conducting pre-renovation asbestos sampling for a

multi-story building proposed for a complete interior redevelopment. Pre-demolition activities included identifying building material quantities, collecting material samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, data assimilation, and technical report writing.

- **University of Nevada Reno (UNR), Reno, NV** – Responsible for conducting a pre-renovation asbestos assessment on a property owned by UNR for the purpose of assessing possible asbestos containing materials that would require removal during renovation activities. Pre-renovation asbestos assessment activities included identifying building material quantities, collecting material samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, and report preparation.
- **Federal Building, Reno, NV** – Responsible for conducting asbestos air sampling following an asbestos fiber release within an occupied federal building. The air sampling was conducted to ensure that asbestos abatement/cleanup activities were completed in accordance with applicable standards and to ensure the safety of the workers within the building. Activities included collecting ambient/perimeter air samples (before, during, and after abatement activities), record keeping and chain-of-custody management, and sample preparation for delivery or shipment to laboratory.
- **Single Family Residence, Reno, NV** – Responsible for conducting a pre-demolition asbestos assessment on a single-family residence. The assessment activities included identifying building material quantities, collecting material samples following standard operating procedures, record keeping and chain-of-custody management, sample preparation for delivery or shipment to laboratory, and report compilation. This project included destructive sampling procedures to ensure all materials were properly assessed prior to demolition. The report and documents prepared for this project were reviewed and approved by the local air quality department.

Anna Henry, E.I., C.E.M.
Staff Engineer

Professional Experience

Ms. Henry is an environmental engineer with four years of environmental consulting experience. Her areas of expertise include Phase I and Phase II environmental site assessments (ESAs), remediation, characterization, and management of non-hazardous and regulated wastes. Ms. Henry's responsibilities have included comprehensive work plan and report preparation, regulatory liaison, regulatory reporting, permit preparation, as well as field activities including environmental media sampling, drilling oversight, and excavation oversight.

Education

- B.S., Environmental Engineering, University of Nevada, Reno, 2018

Certifications

- Certified Environmental Manager, Nevada CEM #2497
- Nevada Engineer Intern (E.I.) #0T8508
- OSHA, 29 CFR 1910 40-Hour, Hazardous Waste Operations and Emergency Response (HAZWOPER) and subsequent 8-hour Annual Refreshers
- MSHA Part 48, New Miner Training

Project Experience

Phase I Environmental Site Assessments and Transaction Screen Assessments

Staff Engineer responsible for conducting various Phase I ESAs in Nevada. Properties assessed include: undeveloped and vacant land, gasoline and automotive service stations, dry cleaning facilities, residential properties, agricultural land, industrial and manufacturing facilities, and office/retail sites. Projects have included coordination with city, county, state, and federal agencies, as well as property owners, land managers, tenants/occupants, and other parties. Assessments conducted following accepted consulting practices and in accordance with applicable ASTM International Standards 1527 or 2247, the EPA's All Appropriate Inquiry (AAI) ruling, and individual client scopes including Vapor Encroachment Screening and Business Environmental Risks evaluation for asbestos, lead paint, radon, and mold.

Phase II Limited Site Investigations

Staff Engineer responsible for conducting environmental media sampling of commercial properties and private land in Nevada and California to assess for the presence of contamination in soil and/or groundwater. Projects include evaluation of petroleum releases associated with underground storage tanks, dry cleaning chemicals, and residual contamination from historic use of pesticides, herbicides, fertilizers, and other chemicals of concern. Responsible for identification of contaminant delineation and preparing a report of findings following review of analytical results.
