The Shielded Radiology Room Is the Asset

Building a new radiographic suite in New York means architectural filings, shielding design by a medical physicist, and DOHMH registration — with the shielding alone representing a six-figure line item. Here, the lead-shielded room, its leaded door, its adjoining observation room, and its regulatory standing already exist. An incoming practice engages a physicist to survey the existing room and registers its own equipment with DOHMH. Most recently home to a multi-specialty orthopedic and physical-therapy practice — with the workers' comp referral ecosystem and IME providers within walking distance.

WHY THIS FLOOR

- **Grandfathered lead-shielded radiology room** — leaded door + observation room
- **7 exam rooms · 16 windows** · ~800 SF open therapy suite
- **4 bathrooms** + private elevator landing — the floor is yours alone
- \$760K–\$1.1M+ of in-place clinical infrastructure, inherited debt-free
- **Central HVAC · direct-metered utilities** · C5-4 medical as-of-right
- DOHMH re-registration in 4–6 weeks · **TIA considered on longer terms**

A NATURAL DROP-IN FOR

- Workers' compensation & no-fault multi-specialty clinics
- Physical therapy & rehabilitation practices
- Pain management groups
- Orthopedic practices & hospital-affiliated satellites
- Podiatry · dermatology & cosmetic practices
- IME/QME providers — courts adjacency

Tour the space this week

Available October 2026 — tour ahead of the market. Co-brokers welcome — 50/50.
