----	----------------------------

-
- Figure 1: Typical cross-sections of a reinforced concrete wall. The figure shows seven vertical sections labeled (a) through (g). Each section illustrates the reinforcement layout for different wall types and loading conditions. (a) shows a wall with horizontal reinforcement and vertical bars. (b) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. (c) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. (d) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. (e) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. (f) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. (g) shows a wall with horizontal reinforcement and vertical bars, with a note 'DO NOT REINFORCE WITH VERTICAL BARS'. The figure includes dimensions for wall height, reinforcement spacing, and bar diameters.
