

RAILROAD COMMISSION OF TEXAS

OIL AND GAS DIVISION

April 14, 2026

Mr. Joseph Rothchild
Affinity Bayview I, Ltd.
3010 Ginter Lane
Katy, TX 77494

RE: Certificate of Completion with Restrictions
12.5-Acres of Land, Approximate 12.5 Acre Tract (Site)
League City, Galveston County, Texas
Voluntary Cleanup Number No. 03-15007

Mr. Rothchild:

Staff of the Railroad Commission of Texas (RRC) Voluntary Cleanup Program (VCP) are pleased to provide the enclosed Certificate of Completion with restrictions for the above-mentioned Site under VCP No. 03-15007. Subsequent sections of this letter detail the history of the Site and environmental investigations performed to date to address elevated chloride concentrations in groundwater (GW) beneath the property. The RRC VCP Staff reviewed environmental assessment reports dated between October 2006 and August 2025¹. Environmental investigation activities addressed contaminants of concern (COC) concentration exceedances documented at the approximate 12.5 acre site. Elevated chlorides ranging from 351 mg/L to 21,300 mg/L remained in GW necessitating implementation of an environmental restrictive covenant (RC) to limit GW use. Redevelopment plans for this Site include commercial development.

History of the Site

The Site is an undeveloped 12.5-acre tract of land located off Calder Drive in League City, Galveston County, Texas. The site was accepted into the RRC VCP on July 9, 2015 in response to historic oil/gas (OG) impact to on-site soil and GW associated with recognized environmental conditions (RECs) identified during Phase I Environmental Site Assessment (Phase I ESA) activities. RECs were located on the west side of the property and included three (3) historic OG waste pits situated adjacent to each other and a plugged and abandoned (PA) oil well. This area was designated as the West Area of Concern (WAOC)

Environmental Investigation

¹ Voluntary Cleanup Program No. 03-15007 environmental assessment reports can be accessed through a records search via Neubus <https://rrcsearch3.neubus.com/search-profile?profileId=45> or an RRC Open Records Request.

Prior to entering the VCP, a limited sub-surface investigation performed in 2007 of the WAOC was conducted to confirm the presence or absence of COCs – Total Petroleum Hydrocarbons (TPH), benzene, toluene, ethyl benzene, and xylenes (BTEX), and chlorides - in soil and GW associated with RECs in this area. Select soil samples were also analyzed for arsenic, barium, cadmium, chromium, lead, selenium, silver, and mercury. Laboratory data reported all TPH soil concentrations were reported below the TPH site specific residential Tier 1 Protective Concentration Limit (PCL) of 21,000 mg/kg. TPH was not detected in GW. Additionally, all soil and GW BTEX concentrations were reported below regulatory limits (BRL). However, barium (894 mg/kg, WP-3) concentrations in soil above the residential Tier 1 PCL of 440 mg/kg were reported within the boundaries of the historical OG pits and were limited to shallow soils only (0-5 feet below ground surface, bgs). Chloride concentrations in soil and GW across most of the WAOC were reported above RRC screening limits. As a result, this site was referred to and, subsequently, accepted into the VCP on July 9, 2015.

Phase II Environmental Site Assessment (Phase I ESA) activities conducted in 2015 indicated soil impacts from barium and lead with chlorides impacting both soil and GW. Additional testing indicated all barium concentrations were below Tier 1 PCLs and all lead concentrations were below the $^{Tot}Soil_{Comb}$ PCL (Tier 2 PCL calculated for lead defaulted to total soil combined - $^{Tot}Soil_{Comb}$ PCL of 500 mg/kg). However, chlorides in soils within the pit areas were reported above the RRC Guideline of 3,000 mg/kg and concentrations decreased with increasing distance from the pits. To delineate impacts and confirm plume stability, a GW monitoring plan was implemented, and additional monitoring wells (MWs) were installed across the Site. A Supplemental Site Investigation followed to verify COC soil concentrations and extent of impact. Laboratory data results indicated GW beneath the Site had not been impacted by TPH, BTEX, and RCRA 8 metals at concentrations above TRRP Tier 1 residential Class 3 PCLs. Additionally, the data demonstrated that the chloride plume was stable and that any remaining chloride in soil would not further contribute to the GW contamination plume beneath the property. Surficial soil data indicated no impact from COC concentrations above the TRRP Tier 1 residential $^{GW}Soil_{Class\ 3}$ PCLs and TRRP Tier 1 health-based $^{Tot}Soil_{Comb}$ PCLs. Because chloride remained in GW, remediation through implementation of an environmental restrictive covenant was recommended by the RRC. These details are outlined in the following Remedial Action section of this letter.

Remedial Action

Chloride concentrations (1,530 mg/L, 22 feet bgs for MW-1; 3,480 mg/L, 23 feet bgs for MW-2, 21,300 mg/L, 23 feet bgs for MW-3; 1,680 mg/L, 20.5 feet bgs for MW-4, 351 mg/L, 10 feet bgs for MW-6; 1,340 mg/L, 10 feet bgs for MW-7; 865 mg/L, 20.5 feet bgs for MW-8; 775 mg/L, 22 feet bgs for MW-9) in GW remained above regulatory action levels at the Site. Concentrations ranged from 351 mg/L (MW-6) at the lowest concentrations to 21,300 mg/L (MW-3) which was the highest concentration recorded for the property. As a remedy, an environmental restrictive covenant that limits GW use on the approximate 12.5-acre property was filed in the Galveston County Clerk's Office on January 21, 2026, document number 2026002944.

The restrictions placed on the Site as outlined in the filed Restrictive Covenant in favor of the Commission and the State of Texas are the following:

1. The investigation and assessment reports identified impacted groundwater ranging from 10 to 23 feet bgs. Penetration of the impacted groundwater beneath the Affected Property for any purpose shall only be conducted in such a manner as to prevent the migration or release

of contaminants to any other zone or environmental media and to prevent uncontrolled exposure to human and ecological receptors.

2. Use or consumption of groundwater beneath the Affected Property (Site) ranging from surface to 50 feet bgs, shall be prohibited except for monitoring and remediation purposes.
3. Any water wells completed on the Affected Property must be installed by a Texas Department of Licensing and Regulation (TDLR)-licensed water well driller in accordance with applicable rules. Installed wells shall not be screened/perforated from the surface to 50 feet bgs unless for authorized monitoring purposes and the collection of samples for analysis.
4. These restrictions shall be a covenant running with the land.

The response actions for the Site have achieved response action levels as determined by the standards of the RRC and remain protective as long as the controls listed in the executed restrictive covenant are maintained.

Based on the information provided to the RRC, the Site Remediation Section of the Oil and Gas Division is satisfied that no further action is required to investigate, assess, control, or cleanup contamination under VCP No. 03-15007. Staff of the RRC Site Remediation Section thank you for your participation in the Voluntary Cleanup Program. Your VCP Site has now been closed. Should you have any questions regarding the content of this letter, please contact me at (512) 463 – 6755 or by email at andrea.pinon@rrc.texas.gov.

Sincerely,

Andrea E. Piñon

Andrea Piñon, Ph.D.

Enclosure: Certificate of Completion with Restrictions

**VOLUNTARY CLEANUP PROGRAM
FINAL CERTIFICATE OF COMPLETION
WITH RESTRICTIONS**

As provided for Chapter 91, Subchapter 0, Texas Natural Resource Code.

I, PETER G. POPE, MANAGER OF THE SITE REMEDIATION SECTION, OIL AND GAS DIVISION, RAILROAD COMMISSION OF TEXAS, CERTIFY UNDER CHAPTER 91, SUBCHAPTER 0, TEXAS NATURAL RESOURCE CODE, THAT NECESSARY RESPONSE ACTIONS HAVE BEEN COMPLETED FOR VOLUNTARY CLEANUP PROGRAM SITE VCP NO. 03-15007 FOR THE TRACT OF LAND DESCRIBED IN EXHIBIT "A", BASED ON THE AFFIDAVIT OF COMPLETION OF RESPONSE ACTION, EXHIBIT "B" AND WHICH ARE FURTHER DESCRIBED IN THE APPROVED FINAL REPORT FOR THE SITE. THE APPLICANT WAS NOT A RESPONSIBLE PARTY UNDER SECTION 91.113. ON THE DATE OF ISSUANCE OF THIS CERTIFICATE THE APPLICANT IS QUALIFIED TO OBTAIN THE PROTECTION FROM LIABILITY PROVIDED BY CHAPTER 91, SUBCHAPTER 0, TEXAS NATURAL RESOURCE CODE.

EXECUTED on April 13th, 2026

Peter G. Pope, Manager
Site Remediation Section

STATE OF Texas

COUNTY OF Travis

BEFORE ME, personally appeared Peter G. Pope, Manager, Site Remediation Section, of the Railroad Commission of Texas, known to me to be the person and agent of said commission whose name is subscribed to the foregoing instrument, and he acknowledged to me that he executed the same for the purposes and in the capacity therein expressed.

GIVEN UNDER MY HAND AND SEAL OF OFFICE, this 13th Day of April, 2026.

Notary Public in and for the State of Texas

VOLUNTARY CLEANUP PROGRAM
LEGAL DESCRIPTION FOR A TOTAL OF 12.506-Acres

VCP No. 03-15007

Exhibit - A
Metes and Bounds Description

SURVEY OF PROPERTY LOCATED ON CALDER ROAD, GALVESTON COUNTY, TEXAS. 77573

Survey of 12.506 acres, 544,760 square feet tract of land out of the Perry and Austin Upper League Survey, Abstract No. 19, Lying in League City, Galveston County, Texas and being more particularly described by metes and bounds as follows:

Commencing at a set 5/8" iron rod w/ cap (RWPI) lying on the West right-of-way line of Calder Road, called 60 feet right-of-way, at the Southeast corner of the Magnolia Creek Baptist Church tract and the Northeast corner of the herein described tract for the POINT OF BEGINNING.

Thence, South 03 deg. 02 min. 17 sec. East, along the said West right-of-way line of Calder Road a distance of 636.97 feet to a found 5/8" iron rod for the Southeast corner of the herein described tract.

Thence, South 87 deg. 05 min. 24 sec. West, along the common boundary with a called 9.172 acre tract and the herein described tract a distance of 855.58 feet to a set 5/8" iron rod w/ cap (RWPI) for the Southwest corner of the herein described tract.

Thence, North 02 deg. 58 min. 37 sec. West, along the common boundary with a called 106.390 acre tract and the herein described tract a distance of 636.97 feet to a set 5/8" iron rod w/ cap (RWPI) for the Northwest corner of the herein described tract.

Thence, North 87 deg. 05 min. 24 sec. East, along the common boundary with the Magnolia Creek Baptist Church tract and the herein described tract a distance of 854.90 feet to the POINT OF BEGINNING Containing 12.506 acres 544,760 square feet.

VCP No. 03-15007

EXHIBIT "B"
RAILROAD COMMISSION OF TEXAS
VOLUNTARY CLEANUP PROGRAM
AFFIDAVIT OF COMPLETION OF RESPONSE ACTION

I, Joseph Rothchild, representing Affinity Bayview I, Ltd. attest that the necessary response actions, pursuant to Chapter 91, Subchapter O, Texas Natural Resource Code, have been completed at the approximately 12.5-Acre tract of land described in Exhibit "A" (Site) of this certificate pertaining to Voluntary Cleanup Program (VCP) No. 03-15007 located in Galveston County, Texas. The applicant has submitted and received approval from the Railroad Commission of Texas (RRC) on all plans and reports required by the Voluntary Cleanup Agreement. The plans and reports were prepared using a prudent degree of inquiry of the Site consistent with accepted industry standards to identify all contaminants, waste and contaminated media of regulatory concern. The response actions for the site have achieved response action levels as determined by the standards of the RRC and remain protective as long as the following controls are maintained:

1. The investigation and assessment reports identified impacted groundwater ranging from 10 to 23 feet below ground surface ("bgs"). Penetration of the impacted groundwater beneath the Affected Property for any purpose shall only be conducted in such a manner as to prevent the migration or release of contaminants to any other zone or environmental media and to prevent uncontrolled exposure to human and ecological receptors.
2. Use or consumption of groundwater beneath the Affected Property ranging from surface to 50 feet bgs, shall be prohibited except for monitoring and remediation purposes.
3. Any water wells completed on the Affected Property must be installed by a Texas Department of Licensing and Regulation ("TDLR")-licensed water well driller in accordance with applicable rules. Installed wells shall not be screened/perforated from the surface to 50 feet bgs unless for authorized monitoring purposes and the collection of samples for analysis.
4. These restrictions shall be a covenant running with the land.

These restrictions were filed in the Galveston County Clerk's office on 01/21/2026 under Document No. 2026002944 (Attachment 1). The response actions eliminate substantial present or future risk to public health and safety and to the environment from releases and threatened releases of contaminants at or from the Site. The Applicant has not acquired this certificate of completion by fraud, misrepresentation, or knowing failure to disclose material information. Further information concerning the response actions at this Site may be found in the final report at the central office of the RRC filed under VCP No. 03-15007.

The preceding is true and correct to the best of my knowledge and belief.

Institutional Control Document No. 2026002944

VCP No. 03-15007

**Railroad Commission of Texas
Environmental Restrictive Covenant**

STATE OF TEXAS

§
§
§

COUNTY OF GALVESTON

This Environmental Restrictive Covenant ("Restrictive Covenant") is filed and recorded in the Real Property Records of Galveston County, Texas pursuant to the authority of the Railroad Commission of Texas ("Commission") to control and clean up pollution caused by activities over which the Commission exercises jurisdiction in accordance with Section 91.113 of the Texas Natural Resources Code and affects the real property described as follows:

Affinity Bayview I, Ltd. is the record Owner of fee title to the real property and premises, and appurtenances, thereto, located in Galveston County, Texas, consisting of 12.506 acre tract, out of the Perry and Austin Upper League Survey, Abstract No. 19, in Galveston County, Texas, according to deed recorded in Volume 18, Page 1165, in the Deed Records of the office of the County Clerk Galveston County, Texas, and more fully described on **Exhibit A**, which is attached hereto and incorporated herein, and identified as the "Property".

Groundwater on a portion of the Property, is impacted by certain identified constituents of concern ("COCs"). The Property, considered also to be the **Affected Property**, is presented on **Exhibit A**, and can be described as follows:

Commencing at a set 5/8" iron rod w/ cap (RWPI) lying on the West right-of-way line of Calder Road, called 60 feet right-of-way, at the Southeast corner of the Magnolia Creek Baptist Church tract and the Northeast corner of the herein described tract for the POINT OF BEGINNING.

Thence, South 03 deg. 02 min. 17 sec. East, along the said West right-of-way line of Calder Road a distance of 636.97 feet to a found 5/8" iron rod for the Southeast corner of the herein described tract.

Thence, South 87 deg. 05 min. 24 sec. West, along the common boundary with a called 9.172 acre tract and the herein described tract a distance of 855.58 feet to a set 5/8" iron rod w/ cap (RWPI) for the Southwest corner of the herein described tract.

Thence, North 02 deg. 58 min. 37 sec. West, along the common boundary with a called 106.390 acre tract and the herein described tract a distance of 636.97 feet to a set 5/8" iron rod w/ cap (RWPI) for the Northwest corner of the herein described tract.

Environmental Restrictive Covenant

109, 2026

Page 1 of 7

Thence, North 87 deg. 05 min. 24 sec. East, along the common boundary with the Magnolia Creek Baptist Church tract and the herein described tract a distance of 854.90 feet to the POINT OF BEGINNING Containing 12.506 acres 544,760 square feet.

This Restrictive Covenant is required for the following reasons:

The **Affected Property** was operated as an oil and gas production site, historic oil/gas waste pits and a plugged and abandoned oil well, otherwise known as 12.506 Acre Tract that was operated by Superior Oil Company ("Exxon Mobil") from 1982 to 2001; wherein COCs attributable to the operations at the 12.506 Acre Tract by Superior Oil Company ("Exxon Mobil") impacted groundwater and an environmental investigation and response action was required in accordance with Commission regulations. Affinity Bayview I, Ltd. performed the response action to characterize and remediate the COCs.

The remediation was performed in such a manner that COCs remained in groundwater at the Affected Property when the Restrictive Covenant was filed with the County. The COCs and the maximum levels remaining in the Affected Property are specified on Exhibit B - *COCs Remaining in Groundwater*. The investigation, assessment, remediation and analytical data are contained in the RRC project case file Voluntary Cleanup Program ("VCP") number 03-15007 further summarized in the following reports:

- Phase I Environmental Site Assessment, 102 Acres – Bayview Development, Calder Rd., League City, Galveston County, Texas, prepared by DCH Environmental Consultants LLC for Affinity Development Company, dated October 2006;
- Limited Subsurface Investigation, Approximate 100 Acres, Calder Rd., Bayview Development League City, Galveston County, Texas, prepared by DCH Environmental Consultants LLC for Affinity Development Company, dated April 16, 2007;

- Remediation Action Completion Report, Approximately 12.5 Acre, Calder Rd., League City, Galveston County, Texas, prepared by DCH Environmental Consultants, LLC. for Affinity Development Company, dated June 17, 2022;
- Response to Comments, RACR letter dated August 29, 2022, Approximately 12.5-Acre Tract (Site), Calder Drive, League City, Galveston County, prepared by DCH Environmental Consultants LLC. for Affinity Bayview LLC, dated March 24, 2023;
- Environmental Work Plan, Approximately 12.25-Acre Tract, Calder Drive, League City, Galveston County, Texas, prepared by Terracon Consultants, Inc. for Railroad Commission of Texas, dated August 19, 2024
- Environmental Response Report, Approximately 12.25-Acre Tract, Calder Drive, League City, Galveston County, Texas, prepared by Terracon Consultants, Inc. for Affinity Bayview I, Ltd., dated December 20, 2024;
- Terracon Consultants, Inc. *Email to Railroad Commission of Texas, Soil Work Plan*, February 17, 2025;
- Supplemental Site Investigation Report, Approximately 12.25-Acre Tract, Calder Drive, League City, Galveston County, Texas, prepared by Terracon Consultants, Inc. for Affinity Bayview I, Ltd., dated August 25, 2025;
- Groundwater Monitoring Report, Approximately 12.25 Acres, Calder Drive, League City, Galveston County, Texas, prepared by Terracon Consultants, Inc. for Affinity Bayview I, Ltd., dated August 25, 2025;

Copies of the reports may be obtained from Affinity Bayview I, Ltd. and from the Commission under Voluntary Cleanup Program ("VCP") number 03-15007.

The response action has been approved by the Commission based on the presumption that the Affected Property will be protective of residential land use with the implementation of this Restrictive Covenant.

For purposes of this Restrictive Covenant the terms

- "residential land use" means use for dwellings, such as single-family houses and multi-family apartments, children's homes, nursing homes, residential portions of government-owned lands (local, state or federal), day care facilities, educational

Environmental Restrictive Covenant

1-09, 2026

Page 3 of 7

facilities, hospitals, residential portions of ranch and farmland, and parks (local, state or federal).

- “exposure pathway” means the course that a COC takes from a source area to ecological or human receptors and includes a source area, a point of exposure, and an exposure route (e.g., ingestion), as well as a transport mechanism if the point of exposure is different from the source area.

Based on information contained in the investigation, assessment and monitoring reports, if an incomplete exposure pathway is maintained to impacted groundwater exceeding health-based values then the COCs associated with the Affected Property pose no significant present or future risk to humans or the environment. With the filing of this document, the Commission does not require any further remediation of the Affected Property if an incomplete exposure pathway is maintained to impacted groundwater exceeding health-based values.

This Restrictive Covenant is necessary to assure that all present and future owners of the Affected Property are aware of its condition and do not use the Affected Property in the future in any manner inconsistent with the restrictions described in this covenant.

In consideration of the response actions leading to final approved remediation of the Affected Property, the Owner of the Property has agreed to place the following restrictions on the Affected Property in favor of the Commission and the State of Texas. Now therefore, in consideration of these premises and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the following Restrictive Covenant in favor of the Commission and the State of Texas are placed on the Affected Property described in **Exhibit A** to-wit:

1. The investigation and assessment reports identified impacted groundwater ranging from 10 to 23 feet below ground surface (“bgs”). Penetration of the impacted groundwater beneath the Affected Property for any purpose shall only be conducted in such a manner as to prevent the migration or release of contaminants to any other zone or environmental media and to prevent uncontrolled exposure to human and ecological receptors.
2. Use or consumption of groundwater beneath the Affected Property ranging from surface to 50 feet bgs, shall be prohibited except for monitoring and remediation purposes.
3. Any water wells completed on the Affected Property must be installed by a Texas Department of Licensing and Regulation (“TDLR”)-licensed water well driller in accordance with applicable rules. Installed wells shall not be screened/perforated from the surface to 50 feet bgs unless for authorized monitoring purposes and the collection of samples for analysis.
4. These restrictions shall be a covenant running with the land.

For additional information, exposure assumptions with the Restrictive Covenant, please request the information from the Commission or from Affinity Bayview I, Ltd.

SURVEY OF PROPERTY LOCATED ON CALDER ROAD, GALVESTON COUNTY, TEXAS. 77573

Survey of 12.506 acres, 544,760 square feet tract of land out of the Perry and Austin Upper League Survey, Abstract No. 19, Lying in League City, Galveston County, Texas and being more particularly described by metes and bounds as follows:

Commencing at a set 5/8" iron rod w/ cap (RWPI) lying on the West right-of-way line of Calder Road, called 60 feet right-of-way, at the Southeast corner of the Magnolia Creek Baptist Church tract and the Northeast corner of the herein described tract for the POINT OF BEGINNING.

Thence, South 03 deg. 02 min. 17 sec. East, along the said West right-of-way line of Calder Road a distance of 636.97 feet to a found 5/8" iron rod for the Southeast corner of the herein described tract.

Thence, South 87 deg. 05 min. 24 sec. West, along the common boundary with a called 9.172 acre tract and the herein described tract a distance of 855.58 feet to a set 5/8" iron rod w/ cap (RWPI) for the Southwest corner of the herein described tract.

Thence, North 02 deg. 58 min. 37 sec. West, along the common boundary with a called 106.390 acre tract and the herein described tract a distance of 636.97 feet to a set 5/8" iron rod w/ cap (RWPI) for the Northwest corner of the herein described tract.

Thence, North 87 deg. 05 min. 24 sec. East, along the common boundary with the Magnolia Creek Baptist Church tract and the herein described tract a distance of 854.90 feet to the POINT OF BEGINNING Containing 12.506 acres 544,760 square feet.

Exhibit B

COCs Remaining in Groundwater

Exhibit B
COCs Remaining in Groundwater

COCs at the following maximum levels, exceeding the regulatory action level, remained in groundwater beneath the Affected Property:

Environmental Media (1) (2) (Soil, groundwater or air)	Constituents Remaining (3)	Maximum Detected Sample Concentration (4) (5)	Date of Sample Collection	PSH Measured Apparent Thickness in Feet (6) (8)	Total Depth BGS and Location (1) (2) (6), (7)
Groundwater	Chloride	1,530 mg/L	6/24/25	NA	22 feet, MW-1
Groundwater	Chloride	3,480 mg/L	6/24/25	NA	23 feet, MW-2
Groundwater	Chloride	21,300 mg/L	6/24/25	NA	23 feet, MW-3
Groundwater	Chloride	1,680 mg/L	6/24/25	NA	20.5 feet, MW-4
Groundwater	Chloride	351 mg/L	6/24/25	NA	10 feet, MW-6
Groundwater	Chloride	1,340 mg/L	6/24/25	NA	10 feet, MW-7
Groundwater	Chloride	865 mg/L	6/24/25	NA	20.5 feet, MW-8
Groundwater	Chloride	775 mg/L	6/24/25	NA	22 feet, MW-9

- (1) Groundwater – A saturated geologic formation, group of formations, or part of a formation.
- (2) Soil includes surface soils and subsurface soils. For surface soil, the soil zone extending from ground surface to fifteen feet in depth for residential land use; or to the top of the uppermost groundwater-bearing unit or bedrock. Whichever is less in depth. For subsurface soil, the portion of the soil zone between the base of surface soil and the top of the groundwater-bearing unit(s).
- (3) Constituents identified as Site-specific chemicals of concern (COCs) that exceed the regulatory action level within the “Affected Property”
- (4) milligrams per kilogram (mg/kg)
- (5) milligrams per liter (mg/L)
- (6) Boring (B)
- (7) Monitor Well (MW)
