PORT OF VIRGINIA

The Port of Virginia is the fastest growing port on the East Coast and boasts the largest natural deep-water harbor on earth. Every major shipping line in the world calls on the Port of Virginia, providing direct access to over 80 ports worldwide, and 10% of the state's entire resident workforce have port-related jobs. In addition to the 50-foot-deep channels, the port is only 18 miles from open ocean and enjoys a mild climate that allows year-round shipping. Coupled with the largest and fastest container cranes on the planet, the rapid pace that seems to break records practically every month in TEU volume, shows no signs of slowing down.
