

**FLOOR PLAN GENERAL NOTES**

- A. All construction shall be in accordance with the requirements of the applicable codes, engineering and contract documents, and all applicable regulations, laws and codes, including but not limited to the accessibility standards and requirements of "Americans with Disabilities Act."
- B. Each trade is advised that information contained in this work may cause an increase in the cost of the contract documents. There is every intent of drawings for notes and symbols. Notes shall be reviewed and approved by related building components regardless of their location in the drawings and specifications.
- C. Unless noted otherwise, any size, detail, or feature indicated for one condition shall be applicable for all other similar conditions.
- D. The Contractor shall furnish and install all blocking, shimming, bracing, banding, plating and supporting hardware required for the proper installation of all building components as recommended by the manufacturer and required by code. In walls, provide blocking attached to studs as blocking supports for wall-mounted items.
- E. All exterior joints shall be effectively sealed from each side to avoid molecular breakdown.
- F. All exterior joints around windows and door frames, between walls and floors, between walls and roof, between wall panels, at penetrations of utilities through the exterior shall be sealed or weather-stripped to prevent air and moisture leakage/infiltration.
- G. Finish floor elevations are to the top of concrete, unless noted otherwise.
- H. Interior partitions are dimensional in face of gypsum board, unless noted otherwise. Do not scale drawings. Questions regarding dimensions shall be reported to the Architect.

**FLOOR PLAN KEY NOTES**
