# THE VILLAGES

**The Villages®** is one of the fastest-growing retirement communities in the U.S., spanning over 57 square miles in Central Florida and home to more than 150,000 residents—predominantly active adults aged 55+. This population is highly-engaged, affluent and health-conscious, creating strong demand for retail, dining, and healthcare services. With most residents living full-time and relying on local amenities, businesses have a unique opportunity to serve a concentrated, stable customer base in a vibrant, master-planned environment. The community's design fosters accessibility and convenience. Residents primarily travel by golf cart, making proximity to Town Squares and key amenities critical for commercial success. These squares host nightly entertainment, events and shopping, while driving consistent foot traffic. For medical providers, the demographic profile translates into significant demand for primary care, specialty practices, urgent care and wellness services.

The Villages already supports a robust healthcare infrastructure, but continued growth ensures room for expansion in areas like orthopedics, cardiology, physical therapy and senior-focused wellness programs. Retailers and service providers benefit from a lifestyle-driven economy. With thousands of clubs, recreational activities and educational programs, residents prioritize experiences and convenience. Businesses that align with this active lifestyle—such as fitness centers, specialty retail and dining—thrive in this market. Medical tenants can leverage this dynamic by offering integrated health solutions, preventive care and concierge-style services that cater to a population seeking quality and accessibility.

In short, The Villages represents a rare opportunity: a large, affluent and growing community with predictable demand for healthcare and lifestyle services. For medical tenants, positioning within this market means tapping into a loyal customer base and benefiting from a well-established infrastructure designed to support long-term growth.
