About Northern Nevada

# Market Overview

Winnemucca, a hidden gem in the high desert landscape, lies at the heart of northern Nevada, serving as a pivotal link between major urban hubs like Reno, NV, Boise, ID, and Salt Lake City, UT. Strategically positioned, it marks the juncture of the northern US Highway 95, which stretches from Oregon and Idaho, and Interstate 80, a key transcontinental route traversing the vast expanse from central California to Utah. This quaint community, often referred to as an “oasis in the desert,” surprises travelers with its serene beauty and vibrant culture.

As the sole incorporated city and county seat of Humboldt County, Nevada, Winnemucca is more than just a passageway; it's a thriving hub with a population of 7,174 people, 2,736 households, and 1,824 families as of the 2000 census. The city's economy is buoyed by large mining companies and businesses catering to the gold mining industry, offering ample employment opportunities to its residents.

Humboldt County is the oldest county in Nevada that has built its economy around agriculture, mining, and tourism. Mining has been a cornerstone since the beginning, with rich mineral deposits of gold, dolomite, opal, petrified wood and silver. Today, Humboldt County is working towards expanding its overall mineral mining portfolio to include lithium. Large lithium deposits have been identified in the McDermitt Caldera area, which presents a unique opportunity to develop a significant supply to satisfy increasing market demands.

Lithium America has already constructed a 2,000 person man camp and begun construction on what is now the largest Lithium mine in America, creating a significant demand for housing in the Winnemucca area.

Moreover, with a burgeoning tourism sector, Winnemucca is attracting a growing number of visitors, drawn by its unique charm and outdoor recreational activities. Notably, until 2013, Winnemucca Farms operated the world's largest potato dehydration plant, contributing significantly to the region's agricultural prominence. Today, the area remains one of the largest potato farming regions globally, underscoring the city's rich agricultural heritage and its enduring importance in the state's economy.

In June 2018, 61 of Nevada's low-income census tracts received official designation as Qualified Opportunity Zones (QOZ) by the U.S. Department of Treasury and the IRS. The tax incentives reduce taxes on realized capital gains that are quickly reinvested into these designated census tracts by providing three benefits:

-  The deferral of taxes
-  A reduction in taxes by 10 to 15 percent
-  The exclusion of capital gains tax on appreciation if held for 10 years
