Ladies and Gentlemen,

Globe Electric is an established company since 1976 registered and certified throughout the country as MWBE/SBE/DBE company. We are a supply company with a diversified product line serving industrial, transportation parts, and maintenance needs to the public sector. Our customers of more than forty-five years are cities, states, counties, school districts, correction facilities, highway departments, and mass transit authorities throughout the country.

We have an established relationship with major manufacturers. With our experience and reputation, we build a rapport with major manufacturers and large general contractors. Our experience and years of business allow us to participate in major projects worth of millions of dollars with both general contractors, manufacturers, and the public entity which is unusual for the size of our company.

Now, with the rebuilding of the infrastructure of the country, there are billions of dollars worth of federal and local funds designated to rebuild bridges, highways, schools, correction facilities, and rebuilding our transit system. Those projects have a set goal of approximately 17 – 21 percent working with qualified, certified MBWE, SBE, and DBE.

This business could be great for minority, women, and/or veteran-owned companies and individuals. After intense investigation and providing documents that represent experienced and repeated transactions on the following commodities and product lines, we have obtained the following diversified federal NAICS codes certification. Which is practically non-existent in one company since most companies focus typically on one area only. Our product diversification and experience allow us to partner with major general contractors in order for them to achieve their large % goal on those major projects using Globe as a partner is always welcome. We can provide but not limit it to light and heavy rail parts and equipment, bus parts, automotive parts, maintenance parts, industrial machinery and equipment, communication parts and equipment, computer hardware and software, safety parts and equipment, electrical apparatus parts and equipment, electronic parts, and equipment, CCTV parts and equipment, tools, and commercial parts and equipment.
