CONTINUED DESCRIPTION

Designed around both the buildings and the grounds, this property offers an opportunity to create a true destination rather than a conventional commercial location. The two-building configuration provides flexibility for separating customer-facing areas, operations, retail, offices, private gathering spaces, or complementary uses, while the loft adds another distinctive element to the property. The expansive outdoor areas become an extension of the usable space, offering multiple opportunities for seating, displays, events, gardens, or customer gathering areas.

The established landscaping, waterfall and koi pond create a welcoming environment with character already in place. The fully fenced site provides separation and definition from surrounding properties while allowing an incoming owner to further develop the indoor/outdoor connection to complement their business concept.

With more than half an acre, multiple structures, extensive outdoor areas, and a history of both restaurant and florist operations, the property offers versatility that is difficult to replicate. Whether envisioned as a restaurant and patio experience, garden-oriented retail concept, coffee or tasting destination, specialty retail, event venue, or creative owner-user property, the site provides a unique foundation for a business where the setting itself can become part of the customer experience. Buyer to independently verify property characteristics, square footage, zoning, intended use, permits, and required approvals with the City of Redding.
