

SPACE TO
OPEN MINDS

camLIFE

CAMBRIDGE, UK

Inspired by potential

As the premier owner and operator of Class-A science real estate in the US, Longfellow is excited to deliver CamLIFE, a Lab and Innovation focused Environment to Cambridge.

Creativity and innovation flourish when the fundamentals are in place to support and stimulate people, organisations and collaborative endeavours.

“Longfellow showed outstanding professionalism from the start of the design process and offered a custom solution projecting us to occupy our new headquarters at Biovista in San Diego, CA. Longfellow's ability to manage consultants and budget, and their transparency throughout the entire process was critical to our company's success and we look forward to the partnership with Longfellow ahead!”

Dr. Bill Efcavitch
Co-Founder & Scientific Officer
Molecular Assemblies

Space for start-ups, spin-outs, scale-ups and global enterprises

Up to 170,000 sq ft

of high-quality, fitted lab space to containment level 2 (CL2). Super flexible with options ranging from 7,000 sq ft suites, 20,000 sq ft floors to 75,000 sq ft buildings and plenty in between.

Outstanding location

12 mins from Cambridge station, Cambridge Biomedical Campus and Addenbrooke's Hospital. Easily accessible by cycle, bus and car.

Available as early as Q4 2024

Buildings being delivered through 2024–2025.

Amenity-rich campus

Supported by our ever-expanding hospitality programme, Elevate™.

42-acre parkland campus

With lots of outdoor green space.

170,000 sq ft delivering
as early as Q4 2024

Longfellow

Market-leading investor-operator of science and innovation real estate with a proven track record of operational excellence within both academic and industry environments.

As a long-term proactive owner, we pride ourselves on being a trusted partner of customers at every stage of their life cycle.

Deep expertise in the curation and cultivation of science ecosystems combined with the delivery of high quality amenities and accessible open spaces for our customers and communities.

Extensive experience in the delivery and operation of fitted lab product to meet the needs of early and growth stage companies.

Longfellow

Redwood LIFE

📍 Bay Area, California 🏠 3.3m sq ft 📅 2020-2030

Redwood LIFE currently comprises of 20 buildings and is slated for redevelopment, increasing the property to 3.4 million sq ft by 2030.

Triangle LIFE

📍 Morrisville, North Carolina 🏠 806,000+ sq ft 📅 Available now

Triangle LIFE is an 806,000 sq ft campus home to 30 leading research and technology companies, including: Metabolon, Sensus, Liquidia Technologies and Lonza Pharmaceuticals.

Longfellow

Bioterra

 San Diego, California  320,000+ sq ft  2024

Currently under construction and delivering in early 2024 is Bioterra, a future science hub in the maturing Sorrento Mesa sub market of San Diego, California.

Palo Alto Labs

 Palo Alto, California  260,000 sq ft  Available now

Located just three miles from Stanford University and a short distance from the Stanford Research Park, Palo Alto Lab’s ten buildings total 259,771 sq ft.

Testimonials

“One thing I particularly love about our experience with Longfellow is that they are eager to learn exactly how we operate and what our best practices are in order to better support BioLabs and our resident companies. We love the entrepreneurial mindset they've brought to our partnership and the fact that they are not stuck in a certain mould.”

Dina Uzri
BioLabs
Biovista, San Diego, CA

“Longfellow was the perfect partnership as they welcomed our R&D, manufacturing, and administrative teams on campus to support our development in a seamless transition.”

Katherine Ton-Tho
Gator Bio
Palo Alto Labs, Palo Alto, CA

“Since beginning our partnership in 2012, Longfellow has provided state-of-the-art lab facilities for Duke researchers to conduct their life-changing work. Our region’s future is bright as we continue to work with Longfellow on the Durham ID master planned development that is revolutionizing Downtown Durham into a vibrant life science ecosystem.”

Scott Selig
Duke University
Durham ID, Durham, NC

For cyclists, joggers or an evening out, building facilities include lockers, high quality showers and changing rooms

Well-connected by transport links

It's just 12 mins to Cambridge station.
As well as a straightforward drive, CamLIFE is easily accessed by bus (the route from Cambridge to Fulbourn runs through the campus), cycle and e-scooter (15 mins ride).

This multi-modal connectivity will be further supported with the arrival of the Fulbourn Greenway. As a key part of the city's new sustainable transport network, this will provide an easy and safe connection with Cambridge historic centre for cyclists and runners.

Longfellow is focused on supporting a range of sustainable transport solutions, complementing the existing options. This includes enhanced end-of-journey facilities, EV charging, and a potential campus shuttle service to key transport nodes.

Elevate™ testimonials

SOVA Science District, San Diego, CA

“I would say Elevate is kind of a great community where a lot of different companies are congregated into one area. There is a lot of opportunity for collaboration and learning from other people that you may not normally interact with.”

Octaviano Mora Valencia
Pace Life Science
SOVA Science District, San Diego, CA

“The Sloo, Longfellow's Elevate space at Redwood LIFE, is a place you can go to meet people from other companies and have the opportunity to build partnerships and community.”

Bryn Levitan
Seer
Redwood LIFE, Bay Area, CA

Redwood LIFE, Bay Area, CA

Sustainability

CamLIFE puts sustainability first, starting with the adaptive reuse of what's already on campus.

Retaining and remodelling the current buildings represents a 40% whole-life embodied carbon reduction compared with constructing new net-zero equivalents.

Total savings

8,400t

of CO₂

Energy & Carbon

- ♦ Net-zero energy-ready buildings
- ♦ 10% reduction through solar renewables
- ♦ WLC target of <500kg CO₂
- ♦ Upfront carbon target of <300kg CO₂
- ♦ Target average of 70kWh/m² for offices and 300kWh/m² for labs

That's the same as

4,940

single flights from
London to Boston

Climate Resilience

- ♦ Future weather modelling to assess comfort
- ♦ Upgraded drainage and storm attenuation
- ♦ Designed for durability and functional adaptability
- ♦ All-electric buildings, with low or zero carbon energy sources

1,680

people's annual personal
carbon footprint

Biodiversity & Water

- ♦ Minimum 20% biodiversity net gain target masterplan
- ♦ Use of bioswales
- ♦ Creating new habitats for species
- ♦ Aiming for site-wide water neutrality

Sustainability schemes and accreditations

Through ambitious embodied and whole life carbon targets, Longfellow is aligning its goals with market leading benchmarks from the likes of LETI (Low Energy Transformation Initiative) and UKGBC NZ (UK Green Building Council Net Zero carbon buildings framework).

CamLIFE is targeting BREEAM Excellent and EPC A as well as aligning design with the WELL Building Standard to drive a more sustainable built environment and create a place that positively contributes to health, wellbeing and productivity.

Certifications

- ♦ BREEAM pursuing Excellent
- ♦ Well Gold enabled
- ♦ EPC A: future MEES compliant
- ♦ Nabers enabled
- ♦ Smartscore: Gold
- ♦ Wirescore: Gold

Wellbeing

- ♦ Offices designed for enhanced filtered fresh air (14 l/s/p)
- ♦ Exemplary cycling facilities aligned with BREEAM and WELL
- ♦ Lots of natural light with high-quality artificial lighting (daylight balanced with high colour rendering index)

Circular Economy

- ♦ Existing buildings adapted to be fit for a zero-carbon future
