

Data

NYC Street Map currently provides the following data:

- Boundaries of mapped and unmapped streets
- Official names of streets
- Mapped street widths (usually includes street width and sidewalk width)
- Alteration maps showing approved street changes since 1938 (in some areas, maps are available for streets that have not yet been approved by the City Planning Commission and have not yet taken effect)
- Street and place names established since 1938

This app will be updated as more information becomes available.
