

Biotech Research/Clinical Laboratory Space Westlake Village, CA

The laboratory space is within a 2000 sq. ft. unit of an industrial park; drop ceiling throughout with heating and air conditioning. Sublease includes utilities and high speed internet. The current laboratory is involved in human genomics, personalized medicine, and novel genomic technologies. The laboratory has a California Clinical Laboratory License and CLIA certification for High Complexity Testing (currently inactive). Related or complementary technologies would be of special interest.

Space is currently available in an approximately 1000 sq. ft. laboratory (photo page 2) with new benches and cabinets; it is equipped for biochemistry, molecular genetics, functional genomics, microbiology, etc. There are ten 8' benches, including four full bays and double sink. Up to eight benches and three bays are available for sublease (less space will also be considered). Additional space may be available in what is now configured as a conference room. Lease could include use of equipment, refrigerator, freezer; also general chemicals, glassware, disposables, molecular reagents and kits.
