COMPUTATION

[illegible]

A hand-drawn diagram on a grid background showing a rectangular field. The field is labeled "wire house" in the center. The dimensions are indicated by handwritten numbers: "60" for the width (top and bottom edges) and "40" for the height (right edge). The field is enclosed by a solid line. A dashed line extends from the bottom-left corner of the field, forming a larger rectangle with the field's left and bottom edges. The dimensions of this larger rectangle are labeled "80" for the width (bottom edge) and "60" for the height (right edge). The label "FW" is written in the center of the larger rectangle, below the "wire house" label.

[illegible]

warehouse	FW
$40 \times 60 = 2400$	$62 \times 89 = 5518$
