Subject: Phase I Environmental Site Assessment
Woods Group
13207 North Dekay Road
Chubbuck, Bannock County, Idaho 83202
G|E|M Project No. MB070122A

Dear Valued Client,

G|E|M is pleased to present the results of a Phase I Environmental Site Assessment Report for the above noted subject site. This assessment was performed in compliance with ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site inspection as well as research and interviews with persons and regulatory agencies associated with the subject property. An assessment was made, conclusions stated, and recommendations outlined.

G|E|M appreciates the opportunity to serve your environmental service needs. If you have any questions concerning this report, please don't hesitate to contact us at your convenience.

Sincerely,

Cristina Brischler
Vice President

1.0 EXECUTIVE SUMMARY

Green Environmental Management (GEM) has performed this project in compliance with ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for the site located at 13207 North Dekay Road, Chubbuck, Idaho 83202. The site consists of one Bannock County tax lot identified as R380-303-9803.

SUBJECT PROPERTY DETAILS

Property Name:	Woods Group
Address(es):	13207 North Dekay Road, Chubbuck, Bannock, Idaho
Historical Address(es):	None identified
Property Use:	Industrial
Land Area:	2.59 acres
Number of Buildings:	1
Number of Floors:	1
Basement or Subgrade Areas:	None
Gross Building Area (SF):	6,697 SF (Total)
Date of Construction:	2005
Assessor’s Parcel Number (APN):	R380-303-9803
Type of Construction:	Metal frame, vinyl siding and a metal roof
Additional On-site Development:	Shed, gravel covered areas, landscaping
Current Tenants:	Holm Construction
Current On-site Operations:	The subject property is developed with a building that is used as a maintenance garage and office space.
Utilities:	Electricity: Idaho Power Natural gas: Idaho Power Potable water: Private well Domestic waste: Septic tank
Regulatory Database Listings:	None

The subject property was historically used for agricultural purposes from at least 1953 through at least 2005. In 2005, the subject property was developed with the currently observed commercial property. The property was occupied by Holm Construction, which uses the building on site as a maintenance garage and office space.

Adjoining properties:

LOCATION	ADDRESS	OCCUPANTS OR USE
North:	13207 N Dekay Rd	H & K Storage

	Dekay Road	Road
East:	13173 N Moonglow Ln	Residential

South:	13165 N Dekay Rd,	Kershaw Curb & Gutter
West:	13266 N Yellowstone Hwy	Residential
	12410 Davis Ave	Residential and agricultural

Based on the topographical gradient of the area, the inferred direction of groundwater flow is to the southwest. However, specific groundwater flow directions can vary based on subsurface hydrogeological conditions and cannot be definitively determined in the absence of a subsurface investigation. According to a review of well records made available through the IDWR online database, static water level is expected to be encountered from 50 to 60 feet below ground surface.

SUMMARY OPINION

A *recognized environmental condition (REC)* refers to (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A *de minimis condition* is not a *recognized environmental condition*. The following was identified during the course of this assessment:

- GIEIM did not identify any RECs during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a *recognized environmental condition (REC)* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls. The following was identified during the course of this assessment:

- GIEIM did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. The following was identified during the course of this assessment:

- GIEIM did not identify any HRECs during the course of this assessment.

A *de minimis condition* refers to a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The following was identified during the course of this assessment:

- Used oil filters are crushed on site and picked up by a third-party vendor on an as-needed basis. Some evidence of staining associated with leakage from the containers was observed. However, no drains were located in the immediate vicinity of the stains. Based on the relatively small size and the fact that the staining was located on a paved area, the staining is surficial in nature and is

considered a *de minimis* environmental condition and is not expected to represent a significant environmental concern.

A *Business Environmental Risks (BER)* refers to a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- GIEIM did not identify any *BERs* during the course of this assessment.

CONCLUSIONS AND RECOMMENDATIONS

GIEIM has performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Practice E1527-21. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

This assessment has not revealed evidence of RECs, CRECs, HRECs, or BERs in connection with the subject property. A *de minimis* condition was identified for the subject property. Based on the findings of this assessment, GIEIM does not recommend further environmental investigation.

2.0 INTRODUCTION

2.1 PURPOSE OF THE ASSESSMENT

GIEIM has conducted a Phase I ESA of the subject property located at 13207 North Dekay Road, Chubbuck, Bannock County, Idaho 83202. This assessment was performed in compliance with ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

The purpose of the ESA was to evaluate the site for existing or potential RECs, CRECs, HRECs, and BERs in connection with the subject property. The ESA may also satisfy one of the requirements for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), known also as Superfund, liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." As defined in the American Society of Testing and Materials (ASTM) Practice E1527-21, A *REC* refers to (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 SCOPE OF SERVICES

In completion of this Phase I ESA in accordance with the ASTM E1527-21 guidelines, GIEIM performed the following tasks:

- Visual reconnaissance of the subject and adjoining properties.
- Interviewed individuals having current or past knowledge of the subject property.
- Review of the geologic, hydrologic, and topographic settings.
- Reviewed a third-party regulatory database report for the identification of Federal, State/Tribal and Local Environmental Database listed properties of concern within a prescribed radius of the subject property.
- Reviewed information pertaining to the current and past use of the subject property and adjoining properties, including any regulatory violations.
- Reviewed the available regulatory history of the subject property, including research on the presence of activity and use limitations (AULs) at these agencies.
- Documented the significant environmental features of the site through photographs.
- Prepared a written report documenting our findings, conclusions, and recommendations.

2.3 SIGNIFICANT ASSUMPTIONS

The significant assumption of this assessment is the data discovered and collected for analysis is accurate and complete to the point of being considered reasonably ascertainable data satisfying the *all-appropriate inquiry* requirements of 40 CFR 312, as described in ASTM E1527-21. The findings, conclusion, and recommendation of this report are fully dependent on the accuracy of this information. Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, business environmental risk evaluations, or other services not particularly identified and discussed herein, including an evaluation of vapor encroachment conditions. Information obtained for this ESA was received from several sources we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. An evaluation of the significance of these limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client. This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

2.4 LIMITATIONS AND EXCEPTIONS

GIEIM services consist of professional opinions and recommendations made in accordance with generally accepted assessment principles and practices. These services are designed to provide an analytical tool to assist the client. While reasonable attempts have been made to verify third party information, except as set forth herein, GIEIM makes no representation or warranty regarding the accuracy, quality or completeness of any data provided by governmental or other entities used by GIEIM in the preparation of this report.

The following data gaps, data failure, or significant deviations were identified:

- The User did not complete the ASTM User questionnaire or provide the User information to GIEIM. GIEIM assumes qualification for the LLPs is being established by the User in documentation outside of this assessment.
- GIEIM was not provided with a title report or title records for review for this assessment. The lack of or inability to obtain this information represents a data gap.
- The User did not engage GIEIM to obtain judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Property. Additionally, these documents were not provided to GIEIM for review. The lack of or inability to obtain this information represents a data gap.

- Data gaps in excess of the recommended 5-year interval were encountered. However, based on the available information reviewed, these historical data gaps are not considered to be an issue of concern and are not expected to alter the conclusions or recommendations of this assessment.
- According to a 1953 aerial photograph, the subject property and surrounding area was depicted as cultivated land. Thus, it is assumed prior to 1951 the subject property would have been similar. Based on this notion, the lack of historical data back to 1940 is not expected to significantly alter the findings of this investigation.
- On July 18, 2022, the Chubbuck Fire Department was contacted for information on the subject property. However, as of this writing, no response has been received from this agency. Upon receiving pertinent information in connection with the subject property, GIEIM will immediately issue an addendum to this report if items of environmental concern are identified. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this investigation.

2.5 SPECIAL TERMS AND CONDITIONS

All reports, both verbal and written, are for the benefit of Idaho Central Credit Union and Recovered Energy, Inc. The report may not be relied upon by any other person or entity without the written consent of GIEIM. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with GIEIM granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against GIEIM, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with GIEIM's Proposal and Standard Terms & Conditions executed on July 1, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of GIEIM's liability to the client and all relying parties.

2.6 REPORT VIABILITY TABLE

The various research components associated with this ASTM E1527-21 compliant Phase I report are valid for 180 days. The following table denotes the dates on which the corresponding research was initiated and the resulting expiration date 180 calendar days thereafter.

VIABILITY EXPIRATION DATES		
INQUIRY COMPONENT	COMPLETION DATE	180-DAY EXPIRATION DATE
Interviews with owners, operators, and occupants	July 18, 2022	January 14, 2023
User Provided Information	July 1, 2022	December 28, 2022
Reviews of federal, tribal, state, and local government records	July 5, 2022	January 1, 2023
Site Inspection Date	July 18, 2022	January 14, 2023
The declaration by the environmental professional responsible for the assessment or update	July 25, 2022	January 21, 2023
	Report Expiration	December 28, 2022

Valley flowed down the Portneuf River path about 600,000 years ago, and now forms inverted topography in the middle of Marsh Valley. The Lake Bonneville flood broke out at Red Rock Pass in southern Bannock County about 14,500 years ago and flowed north through Marsh Valley and Portneuf Narrows before is spread out in the Pocatello area as it emptied onto the Snake River Plain. Flood boulders are distinctive landscape elements in the Pocatello and Chubbuck areas.

SOILS: The main soil types mapped at the subject property by the United States Department of Agriculture's Natural Resource Conservation Service are as follows:

- Bahem silt loam, 0 to 2 percent slopes. The parent material consists of silty alluvium.

A copy of the NRCS soil map for the subject property is included in Appendix I.

HYDROLOGY: Based on the topographical gradient of the area, the inferred direction of groundwater flow is to the southwest. However, specific groundwater flow directions can vary based on subsurface hydrogeological conditions and cannot be definitively determined in the absence of a subsurface investigation. According to a review of well records made available through the IDWR online database, static water level is expected to be encountered from 50 to 60 feet below ground surface.

3.3 ADJOINING PROPERTY DESCRIPTION

LOCATION	ADDRESS	OCCUPANTS OR USE
North:	13207 N Dekay Rd	H & K Storage
East:	Dekay Road	Road
	13173 N Moonglow Ln 13153 N Moonglow Ln	Residential Residential
South:	13165 N Dekay Rd,	Kershaw Curb & Gutter
West:	13266 N Yellowstone Hwy	Residential
	12410 Davis Ave	Residential and agricultural

4.0 SITE RECONNAISSANCE

4.1 SITE RECONNAISSANCE AND LIMITING CONDITIONS

SITE INSPECTION DETAILS	
GIEIM Environmental Professional	Michelle Bethune
Site Reconnaissance Date	July 18, 2022
Weather Conditions	Sunny and 90 degrees
Site Escort and relationship	Nicole Hessinger/manager
Areas inspected	All areas were available for observation
Areas not inspected	N/A

See Appendix A for Site Plan for the subject property. Photographs of the site taken during the reconnaissance are provided in Appendix B. A summary of the observations made during the site reconnaissance is provided below.

4.2 ON-SITE OBSERVATIONS

During the site reconnaissance, GIEIM observed the following environmental conditions:

SITE OBSERVATIONS	
Site Operations, Processes, and Equipment	Emergency Generators: None observed
	Dry Cleaning: None observed
	Manufacturing or Fabrication: None observed
	Photo Processing/X-Ray Processing: None observed
	Waste Treatment Systems and/or Water Treatment Systems: None observed
	Other Processes and Equipment: The used oil, hydraulic fluid, or any other hazardous wastes drain into the on-site trench drain which is then pumped into the used oil bin that is picked up by a third-party vendor. These items are not anticipated to pose an environmental concern to the subject property.
	Automotive Repair (engine repair, body repair, minor automotive servicing): The facility operates a truck maintenance facility. One trench drain was observed. Nicole Hessinger opened the trench drain by lifting the grate, the interior of the trench was clean with no debris and no obvious signs of cracks in the concrete. It was reported that the trench drain is cleaned out monthly. The drain is not anticipated to pose an environmental concern to the subject property.
	Paint Booth: None observed
Parts Washer: One parts washer was observed. It was reported Safety-Kleen picks up the used oil on an as-needed basis. No records of spills or over filling	

	<p>was observed near the perimeter of the parts washer. The parts washer is not anticipated to pose an environmental concern to the subject property.</p>
Aboveground Chemical Storage	<p>Aboveground Storage Tanks (ASTs): One 250-gallon AST of used oil; four 100-gallon new oil ASTs were observed in the maintenance warehouse. The new oil is pumped into coiled tubes that as needed can be used to add new fluid to vehicles. The ASTs are not anticipated to pose an environmental concern to the subject property.</p>
	<p>Drums, Barrels and/or Containers: Multiple 30-gallon and 55-gallon drums were observed and were located either in a bermed area or on secondary containment. The drums contained gear oil, hydraulic fluid, new oil, and anti-freeze. The drums are not anticipated to pose an environmental concern to the subject property.</p>
	<p>Maintenance Supplies/Cleaning Supplies: No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose an environmental concern to the subject property at this time.</p>
Underground Chemical Storage, Drainage or Collection Systems	<p>Underground Storage Tanks/Vent Pipes/Fill Ports/Pumps: None observed</p>
	<p>Sumps, Cisterns, Catch Basins, Dry Wells: One floor drain is located in the on-site vehicle maintenance facility, in the vehicle service pit. The drain reportedly discharges into the on-site used oil AST bin located in the shop by a pump system, which subsequently is picked up by a third-party vendor (Rock Canyon) on an as needed basis. Due to the use of the subject property for vehicle repair and oil changes, hazardous substances and petroleum products are utilized on site. Based on the age of the subject property building (approximately 13 years as well as the lack of chlorinated solvents utilized on the property, the feature is not expected to represent a significant environmental concern. However, the User of this report should be aware that the likelihood of a release increases over time, as these systems age.</p>
	<p>Grease Traps: None observed</p>
	<p>Septic Tanks/Leach Fields: A septic tank and associated leach field is located south and southwest of the shop building onsite. The septic tank reportedly receives wastewater from the men's and women's restrooms and showers. Based on this information, the septic tank and leach field does not pose an environmental concern to the subject property.</p>
Electrical Transformers /	<p>Pad-Mounted/Pole-Mounted/Vault Transformers: The management of potential polychlorinated biphenyl (PCB) -containing transformers is the</p>

PCBs/Hydraulic Equipment	<p>responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.</p> <p>Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.</p> <p>During site reconnaissance, GIEIM observed three pole-mounted transformers. However, no evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.</p>
	Hydraulic Lifts: None observed
	<p>Air Compressors: One air compressor was observed outside in a storage area located on the north side of the building that is used for pneumatic tools. The air compressor is not anticipated to pose an environmental concern to the subject property.</p>
	Elevators/Truck Scales: None observed
	Trash Compactors/Box Compactors: None observed
Releases or Potential Releases	Stressed Vegetation: None observed
	Stained Soil: None observed
	Stained Pavement/Stained Floors or Similar Surface: None observed
	Leachate and/or Waste Seeps: None observed
	<p>Trash, Debris, and or other Waste Materials: Used oil filters are crushed on site and picked up a third-party vendor on an as-needed basis. Some evidence of staining associated with leakage from the containers was observed. However, no drains were located in the immediate vicinity of the stains. Based on the relatively small size and the fact that the staining was located on a paved area, the staining is surficial in nature and is considered a <i>de minimis</i> environmental condition and is not expected to represent a significant environmental concern.</p>
	Dumping or Disposal Areas: None observed
	Construction/Demolition Debris and Fill Soil: None observed
	Surface Water Discoloration, Odor, Sheen, and/or Free-Floating Product: None observed
Strong, Pungent, or Noxious Odors: None observed	

	Exterior Pipe Discharges, and/or Other Effluent Discharges: None observed
Other Notable Site Features	Railroad Tracks or Spurs: None observed
	Telecommunications Tower or Equipment: None observed
	Pipeline Markers: None observed
	Detention Ponds or Retention Ponds: None observed
	Water wells/Irrigation wells or pivots/Monitoring Wells/Observation Wells: None observed
	Quarries or Pits: None observed
	Surface Water Bodies: None observed
	Medical Sharps Containers: None observed

4.3 ADJOINING PROPERTY OBSERVATIONS

During the site reconnaissance, GIEIM observed the following adjoining environmental features:

SUMMARY OF EXTERIOR OBSERVATIONS	
Operations	Gasoline Station: None observed
	Dry Cleaning: None observed
	Commercial Strip Center: None observed
	Manufacturing/Fabrication: None observed
	Automotive Repair (engine repair, body repair, minor automotive servicing): None observed
Features	Water Bodies: None observed
	Railroad Tracks: None observed
	Transformers: None observed
	Drains: None observed
	Monitoring Wells/Remediation Equipment: None observed

5.0 HISTORICAL REVIEW

5.1 CHRONOLOGICAL USE HISTORY

GIEIM reviewed historical use information about the subject property from sources identified throughout this section. A chronological listing of the historical data checked is summarized in the table below:

DATE	SOURCES CHECKED	PROPERTY USE
Prior to 1948	Aerial Photographs	Unknown use; data gap; refer to Section 2.4
1950s-2005	Aerial Photographs, USGS Topographic Maps, City Directories, Assessor Records, Building Records, Interviews	Agricultural Land
2005- July 2022	Aerial Photographs, USGS Topographic Maps, City Directories, Assessor Records, Building Records, Interviews, Site Reconnaissance	Commercial-Current buildings

The subject property was historically used for agricultural purposes from at least 1953 through at least 2005. In 2005, the subject property was developed with the currently observed commercial property. The property was occupied by Holm Construction, which uses the building on site as a maintenance garage and office space.

5.2 AERIAL PHOTOGRAPHS

GIEIM reviewed historical aerial photographs provided by Environmental Data Resources, Incorporated (EDR). See below for discussion.

LOCATION	DESCRIPTION
Subject property	Agricultural land (1953, 1969, 1974, 1980, 1985, 1992); deveopled with the current building (2006, 2009, 2013, 2017)
North	Residential (1953, 1969, 1974, 1980, 1985, 1992); deveopled with the current building (2006, 2009, 2013, 2017)
East	Roadway followed by: Agricultural land (1953, 1969, 1974, 1980); roadway followed by: residential (1985, 1992, 2006, 2009, 2013, 2017)
South	Agricultural land (1953, 1969, 1974, 1980, 1985, 1992, 2006, 2009, 2013, 2017)
West	Residential (1953, 1969, 1974, 1980, 1985, 1992, 2006, 2009, 2013, 2017)

According to the review of aerial photographs, the subject property has historically been developed as agricultural property. There is a potential agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. GIEIM believes it is likely that residual agricultural chemicals (if any) would have degraded as usage has been reduced over the recent years. In addition, residues of these chemicals, if present, are likely to be at concentrations below regulatory health risk-based thresholds for commercial developments. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, GIEIM concludes

that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time. See Appendix E for aerial photographs.

5.3 TOPOGRAPHIC MAPS

GIEIM reviewed the following topographic maps available through the www.historicaerials.com database: 1953, 1971, 1984, 2020.

LOCATION	DESCRIPTION
Subject property	Vacant with no structures (1953, 1971, 1984, 2020)
North	Vacant with no structures (1953, 1971, 1984, 2020)
East	Railroad tracks followed by: Vacant with no structures (1953, 1971, 1984, 2020)
South	Vacant with no structures (1953, 1971, 1984, 2020)
West	Vacant with no structures (1953, 1971, 1984, 2020)

According to the review of historical topographic maps, no features such as buildings, quarries, oil-fields, wetlands, pipelines, etc. were observed. Copies of reviewed topographic maps are included in Appendix E.

5.4 FIRE INSURANCE MAPS

GIEIM contracted EDR for copies of Sanborn Fire insurance maps associated with the subject property and/or adjoining properties from their collection. According to the results of the Sanborn map search, Sanborn map coverage was not available for the subject property or adjoining properties. The Certified Sanborn Map report is included in Appendix E.

5.5 CITY DIRECTORY REFERENCES

Historical and current city directory references reviewed were provided by EDR for historical site and nearby properties' telephone listings. The results of the search are included in Appendix E and are also summarized in the following tables:

LOCATION	DESCRIPTION
Subject property	1992-Banta Construction (13207 North Dekay Road)
	2000-Pro Household Support Systems (13207 North Dekay Road)
	2005-Alan Banta (13207 North Dekay Road)
	2010-2014-H&K Storage (13207 North Dekay Road)
Adjoining Properties	No listings typically associated as environmental issues were identified on adjoining property addresses.

According to the review of city directory references, no environmentally sensitive listings such as dry cleaners, gasoline stations, etc. were identified for the subject property or adjoining properties.

5.6 OTHER HISTORICAL SOURCES

No additional historical sources were used.

6.0 INTERVIEWS

6.1 INTERVIEW WITH OWNER

The owner questionnaire was not completed and returned by the current owner as requested for inclusion within this Report. The subject property owner entity is identified as RDK Investments, LLC and represented by Richard Lewis, Owner. The owner representative has been associated with the subject property for approximately 2 years. The owner representative indicated prior to the construction of the current development in 2005, the subject property was developed with agricultural land. The owner representative was unaware of any environmental issues associated with the subject property or the adjoining properties.

The owner representative was asked the following questions:

Question	Yes	No
Are you aware of any USTs, dry wells, heating oil use, sumps, clarifiers, in-ground lifts, oil/water separators?		✓
Are you aware of any environmental investigations associated with the property such as a Phase I, subsurface investigation and/or cleanup, lead, asbestos, or radon investigation, wetland study, or geotechnical investigation?		✓
Are you aware of any mold growth or complaints? Has mold remediation been conducted at the property in the past? Any water intrusion issues?		✓
Are you aware of any offsite environmental issues that might impact the property?		✓
Comments: None		

6.2 INTERVIEW WITH ESA REPORT USER OR BORROWER

The User of the report is the same as the owner. Please refer to Section 6.1 above for their responses.

6.3 PAST OWNER, OPERATORS/EMPLOYEES, KEY PROPERTY MANAGER, AND/OR OCCUPANTS

Interviews with past owners were not reasonably obtainable. However, based on the quality of information from other sources, including the owner interview, historical and agency records, it is likely this information would have been duplicative.

6.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Local government interviews are summarized in Section 5.

6.5 OTHER INTERVIEWS

No additional interviews were conducted.

7.0 RECORDS REVIEW & REGULATORY INFORMATION

7.1 DATABASE REPORT REVIEW

Environmental Data Resource (EDR) was subcontracted by GIEIM to conduct a search of readily available regulatory environmental database records, and to compile the results into a report format. The search performed by EDR meets the specific requirements of ASTM Standard Practice for Environmental Site Assessments E1527-21.

Definitions of searched database categories are detailed in the EDR report. The EDR report is included in Appendix F of this report. Our review comments of the EDR report are provided below:

7.1.1 *Subject Property Listings*

The subject property was not identified within the EDR database report.

7.1.2 *Adjoining Property Listings*

The contiguous properties were not identified within the EDR database report.

7.1.3 *Other Mapped Listings*

A number of sites were mapped in the EDR report within the specified search radii. All properties identified in the EDR database search attached in Appendix F are summarized in the search's Executive Summary. Properties at lower elevations, or directions or distances beyond impact to the subject property, or whose issues have been dealt with and closed with a "No Further Action" letter, or whose listing is for tracking purposes only or only represents proper notification of registration of underground storage tanks (USTs), above-ground storage tanks (ASTs), or hazardous activities without violations, or whose listing is for *de minimis* issues only, do not currently present environmental risks to the subject property.

7.1.4 *Unmapped Listings*

One additional site is shown on the list of "unmapped sites" provided in each EDR report. Based on the limited information provided in the EDR report, distance, and/or status of the listings, the unmapped site does not appear to constitute a REC for the subject property.

7.1.5 *Vapor Migration*

Vapor migration occurs when vapors from volatile chemicals in polluted soil or groundwater intrude upon another property where they may migrate upwards into the indoor air of overlying buildings, similar to the way radon enters homes. The chemicals responsible for vapor encroachment include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and volatile inorganic compounds such as mercury. Once contaminant vapors enter a structure, they may accumulate and potentially pose health hazards for building occupants.

GIEIM reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, GIEIM has found no evidence of a potential release of vapor encroachment contaminants of concern (as identified in ASTM E 2600-15) into

the subsurface due to the current or past subject-property operations or operations within the site vicinity.

7.2 AGENCY FILE REVIEW

The following resources were contacted to obtain information pertaining to the subject property use and/or information indicating an existing or potential REC in connection with the subject property. Information obtained from these sources is included in the Appendix G.

STATE DEPARTMENT OF ENVIRONMENTAL QUALITY	
Agency Name, Contact Information, Date of Contact:	Findings:
Idaho Department of Environmental Quality, Underground Storage Tank Database and Waste Remediation Facility Mapper 1410 North Hilton, Boise, Idaho 83706 (208) 373-0502 Via online databases http://www.deq.idaho.gov/waste/ustlust/ http://www.deq.idaho.gov/waste-mgmt-remediation/remediation-activities/facility-mapper/ and online public records requests. July 18, 2022	The Idaho Department of Environmental Quality (DEQ) maintains a publicly accessible online database containing information related to environmental incidents within a given search radius. Records are maintained for hazardous waste facilities, cleanup sites, underground storage tanks, leaking underground storage tanks, water quality, air quality, state response sites, and voluntary cleanup sites for the state of Idaho. DEQ did not have any records for the subject property in their online database.

PUBLIC HEALTH AUTHORITY	
Agency Name, Contact Information, Date of Contact:	Findings:
Southeastern Idaho Public Health Department 1901 Alvin Ricken Dr, Pocatello, ID 83201 (208) 233-9080 https://www.siphidaho.org/ July 18, 2022	GIEIM submitted a public records request for a septic system search to the Southeastern Idaho Public Health Department representative, Elisha Mabey on July 18, 2022. They replied with a copy of the septic permit on file for the property. The septic system receives black and gray wastewater from the men's and women's restrooms and showers only. Based on this information, the septic system does not pose an environmental concern to the subject property. A copy of the permit is included in Appendix D.

FIRE DEPARTMENT	
Agency Name, Contact Information, Date of Contact:	Findings:
Chubbuck Fire Department 4727 Yellowstone Ave	Chubbuck Fire Department was contacted by email on July 18, 2022, to request hazardous materials or incidents including fuel releases records regarding the subject property. The Fire

FIRE DEPARTMENT	
Chubbuck, ID 83202 (208) 237-3212 mmiller@cityofchubbuck.us July 18, 2022	Department has not replied at the time of report production.

HISTORICAL BUILDING DEPARTMENT RECORDS	
Agency Name, Contact Information, Date of Contact:	Findings:
City of Boise Planning & Development Services (PDS) 150 North Capital Boulevard, Boise, Idaho 8372 (208) 384-4422 https://cityclerk.cityofboise.org/public-records/records-request-form/ July 18, 2022	GIEIM contacted the Boise Building Department in writing on July 18, 2022, in preparation of this Report to obtain historical building permit information and/or environmentally sensitive documents available for the subject property. No permits were available for the subject property

PROPERTY TAX FILES	
Agency Name, Contact Information, Date of Contact:	Findings:
Bannock County Assessor 130 North 6th Avenue ,Pocatello, Idaho 83201 208-236-7260 https://bannock.maps.arcgis.com/apps/webappviewer/index.html?id=dfe86cb077844d8f8b68ba01ac6f7087 July 20, 2022	The Bannock County Assessor was contacted via the onsite mapper It was reported that the parcel is 2.59 acres and was built in 2005.

7.2.1 Environmental Liens

No evidence of environmental liens or AULs was identified in the EDR radius search or in a search of online records. A review of title and judicial records for environmental liens and AULs was not requested by the users of this ESA.

8.0 USER- AND CLIENT-PROVIDED INFORMATION

8.1 USER QUESTIONNAIRE

The report user did not complete the ASTM User questionnaire or provide the User information to GIEIM. GIEIM assumes qualification for the LLPs is being established by the User in documentation outside of this assessment.

8.1.1 Title Records

GIEIM was not provided with a title report or title records for review for this assessment. The lack of or inability to obtain this information represents a data gap and is discussed in Section 2.4.

8.2 PREVIOUS REPORTS

No previous reports or other documentation was provided for review.

9.0 NON-ASTM SCOPE ITEMS & ADDITIONAL SERVICES

The following services fall outside the standard scope of work for an ASTM E1527-21 Phase I. Although these services are specifically excluded from the ASTM standard, during the course of our assessment G|E|M made the following observations for the User's consideration.

9.1 ASBESTOS EVALUATION

Asbestos (a cancer-causing material) was commonly used as an acoustic insulator, thermal insulation, fire proofing and in other building materials such as ceiling and floor tiles, sprayed-on insulation, pipe wraps, mastics, wall board, mortar, and roofing materials until the late 1970s. Raw materials and finished goods inventories of ACMs were allowed to be utilized until depleted. However, ACMs are still imported into the U.S. and used in new building construction.

When ACMs are disturbed, or the materials become damaged it becomes a hazard. The term 'friable' is used to describe asbestos that can be reduced to dust by hand pressure. 'Non-friable' means asbestos too hard to be reduced to dust by hand.

Based on the age of the subject property building (2005), ACMs are unlikely to be present.

Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires an asbestos survey adhering to Asbestos Hazard Emergency Response Act (AHERA) sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local air pollution control or air quality management district and specifies all suspect building materials be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, Occupational Safety & Health Administration (OSHA) regulations require specific work practices be implemented when handling construction materials and debris that contain ACMs.

9.2 LEAD-BASED PAINT EVALUATION

Lead is a pliable, soft metal used in the construction of pipes, rods, and containers. Before 1978, lead was a common ingredient in paint because it added strength, shine and extended the life of the paint. In 1978 the EPA banned the use of lead pigments in paints used on interior and exterior residential surfaces. Lead poisoning can result from children having access to, and ingestion (by chewing) of LBP covered surfaces. Inhalation of dust produced by normal oxidation, or scraping/sand-blasting of the paint, which may contain significant amounts of lead, is also a health hazard. The EPA/HUD action level for LBP is 0.5% dry weight.

A lead paint survey was not performed as part of this ESA. However, due to the age of the subject property building (2005), it is unlikely LBP is present.

9.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 picocuries per liter of air (pCi/L). Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is associated with its rate of accumulation within confined areas, particularly confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure.

The US EPA has prepared maps with radon zone designations for every county in every state in the US, and each zone represents average indoor radon concentrations within the respective county. A description of the three primary radon zones and their respective averages is presented below:

ZONE	AVERAGE PREDICTED RADON LEVELS	POTENTIAL
Zone 1	Above 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi//L	Moderate
Zone 3	Below 2.0 pCi/L	Low

According to the US EPA, radon concentrations vary greatly from one property to the next. Therefore, the radon zone information presented in the table above is merely an indication of the average KNOWN concentration of radon within a given zone. Specific radon concentrations for any given site cannot be definitively determined in the absence of radon sampling and analysis.

According to regional radon information obtained from the EPA, the subject property is located within EPA-designated Zone 2 for radon gas. Based on the moderate potential for radon at the subject property, no further action regarding radon is recommended at this time. A copy of the EPA Radon Zone Map is included within Appendix I.

9.4 MOLD

A limited visual assessment for evidence of mold-like substances or conditions conducive to mold growth was completed by GIEIM as part of the Phase I ESA. GIEIM's assessment was limited to a visual inspection of readily accessible areas for evidence of water damage or persistent moisture.

No obvious indications of mold growth were observed.

9.5 WETLANDS

A limited visual assessment for evidence indicative of wetlands was completed by GIEIM as part of the Phase I ESA. GIEIM's assessment was limited to a visual inspection of readily accessible areas for evidence of riparian vegetation, marshy natural areas, or other wetlands. Evidence of wetlands was not observed.

GIEIM additionally mapped the site using the US National Fish and Wildlife online wetlands mapping application (<http://www.fws.gov/wetlands/Data/Mapper.html>). Wetlands were not identified on the subject property. A copy of the map created with the wetlands mapping application is included within Appendix I.

9.6 METHANE

The Idaho Geological Survey online interactive mapper online Oil & Gas Well Log View map was reviewed for oil and gas development concerning the subject property and nearby properties. According to the map, there are no oil or gas wells within 500 feet of the subject property. No environmental concerns were noted during the map review.

Additionally, GIEIM's review of the current and historical topographic maps did not reveal any listed oil fields or seeps in the vicinity of the subject property.

10.0 EP STATEMENT & SIGNATURE BLOCK

OVERVIEW

GIEIM prepared a Phase I ESA of the property located at 13207 North Dekay Road, Chubbuck, Bannock County, Idaho 83202 in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

This ESA was reviewed by Cristina Brischler, Senior Environmental Professional. Research and preparation of this ESA was conducted by Michelle Bethune, Environmental Professional. Personnel biographies are included in Appendix J.

QUALIFICATION DECLARATION

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Green Environmental Management were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Limited Permission To Make Copies

Green Environmental Management (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's Idaho Leaking UST Tracking Form database.

A review of the LUST list, as provided by EDR, and dated 03/28/2022 has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2022	Source: EPA
Date Data Arrived at EDR: 05/05/2022	Telephone: N/A
Date Made Active in Reports: 05/31/2022	Last EDR Contact: 07/01/2022
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/10/2022

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

Target Property Map:	14894888 POCATELLO NORTH, ID
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
POCATELLO NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Bahem

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
2	11 inches	48 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
3	48 inches	59 inches	extremely cobbly sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Broxon

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
2	7 inches	25 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
3	25 inches	59 inches	extremely stony sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Broncho

Soil Surface Texture: cobbly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

1	0 inches	5 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
2	5 inches	12 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4
3	12 inches	59 inches	extremely cobbly coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141.14 Min: 141.14	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 208-287-4800

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

SPECIAL FLOOD HAZARD AREAS		Without Base Flood Elevation (BFE) <i>Zone A, V, A99</i>
		With BFE or Depth <i>Zone AE, AO, AH, VE, AR</i>
		Regulatory Floodway
OTHER AREAS OF FLOOD HAZARD		0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile <i>Zone X</i>
		Future Conditions 1% Annual Chance Flood Hazard <i>Zone X</i>
		Area with Reduced Flood Risk due to Levee. See Notes. <i>Zone X</i>
		Area with Flood Risk due to Levee <i>Zone D</i>
OTHER AREAS		NO SCREEN Area of Minimal Flood Hazard <i>Zone X</i>
		Effective LOMRs
GENERAL STRUCTURES		Area of Undetermined Flood Hazard <i>Zone D</i>
		Channel, Culvert, or Storm Sewer
		Levee, Dike, or Floodwall
OTHER FEATURES		20.2 Cross Sections with 1% Annual Chance Water Surface Elevation 17.5
		Coastal Transect
		Base Flood Elevation Line (BFE)
		Limit of Study
		Jurisdiction Boundary
		Coastal Transect Baseline
MAP PANELS		Digital Data Available
		No Digital Data Available
		Unmapped
		The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/22/2022 at 9:10 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

APPENDIX H – PERTINENT HISTORICAL REPORTS

Bannock County Area, Idaho, Parts of Bannock and Power Counties

7—Bahem silt loam, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: 2s9m
Elevation: 4,400 to 4,500 feet
Mean annual precipitation: 9 to 11 inches
Mean annual air temperature: 48 to 54 degrees F
Frost-free period: 110 to 130 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Bahem and similar soils: 85 percent
Minor components: 15 percent
*Estimates are based on observations, descriptions, and transects of
the mapunit.*

Description of Bahem

Setting

Landform: Terraces
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Silty alluvium and/or loess

Typical profile

A - 0 to 11 inches: silt loam
Bk - 11 to 49 inches: silt loam
2C - 49 to 60 inches: extremely cobbly sand

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
*Capacity of the most limiting layer to transmit water
(Ksat):* Moderately high to high (0.57 to 2.00 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 30 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0
mmhos/cm)
Available water supply, 0 to 60 inches: High (about 10.2 inches)

Interpretive groups

Land capability classification (irrigated): 3e
Land capability classification (nonirrigated): 6c
Hydrologic Soil Group: B
Ecological site: R011XA009ID - LOAMY 8-12 ARTTRT/PSSPS
Hydric soil rating: No

Minor Components

Broxon

Percent of map unit: 10 percent

Hydric soil rating: No

Broncho

Percent of map unit: 3 percent

Hydric soil rating: No

Bahem, weakly cemented subsoil

Percent of map unit: 2 percent

Hydric soil rating: No

Data Source Information

Soil Survey Area: Bannock County Area, Idaho, Parts of Bannock and Power
Counties

Survey Area Data: Version 16, Sep 9, 2021

Wetlands

- | | | | | | |
|---|--------------------------------|---|-----------------------------------|---|----------|
|  | Estuarine and Marine Deepwater |  | Freshwater Emergent Wetland |  | Lake |
|  | Estuarine and Marine Wetland |  | Freshwater Forested/Shrub Wetland |  | Other |
| | |  | Freshwater Pond |  | Riverine |

This map is for general reference only. The US Fish and Wildlife Service is not responsible for the accuracy or currentness of the base data shown on this map. All wetlands related data should be used in accordance with the layer metadata found on the Wetlands Mapper web site.

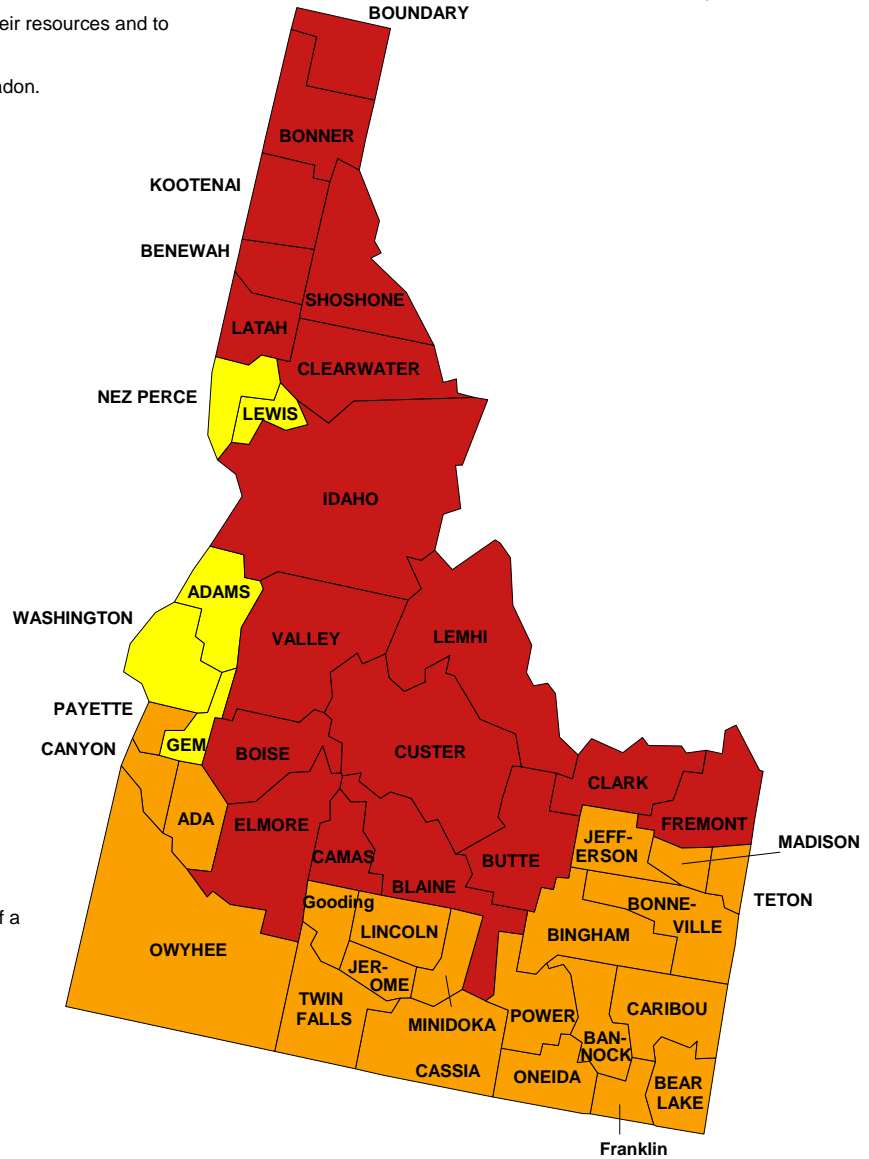

IDAHO - EPA Map of Radon Zones

<http://www.epa.gov/radon/zonemap.html>

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of Idaho" (USGS Open-file Report 93-292-J) before using this map. <http://energy.cr.usgs.gov/radon/grpinfo.html> This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

APPENDIX J – QUALIFICATIONS

13207 North Dekay Road
Chubbuck, Idaho

July 2022

Michelle Bethune

POSITION

Senior Environmental Scientist

EDUCATION

Bachelor of Science in Environmental Science
Colorado Mesa University

PROFESSIONAL DESIGNATION

- AHERA-Certified Asbestos Building Inspector/Supervisor/Project Management
- Environmental Professional

PROFESSIONAL ASSOCIATION

- Commercial Real Estate for Women (CREW)
- Rocky Mountain Association of Environmental Professionals (RMAEP)

PROFESSIONAL EXPERIENCE

Mrs. Bethune has 15 years of experience providing environmental consulting for a variety of clients throughout the United States, with emphasis in Western states. Mrs. Bethune's areas of expertise include Phase I Environmental Site Assessments (ESAs); limited site investigations (LSIs) and Phase II ESAs; remediation of a variety of impacted sites; asbestos investigations and abatement.

Mrs. Bethune is responsible for the management and overview of hundreds of environmental site assessments per year and has participated in thousands of Phase I ESA, LSIs/Phase IIs and remediation projects.

University of Utah School of Medicine-Salt Lake City, Utah

Ms. Bethune served as a senior scientist for the asbestos, Lead-based paint and hazardous material inspections for pre-demolition of multiple buildings.

City of Salt Lake, Salt Lake City

Ms. Bethune served as Project Manager for several pre-demolition asbestos, lead based paint and hazardous material testing for multiple city owned buildings. She reviewed historical and county records, federal, state, and local agency databases, conducted interviews, and authored the reports.

Valdez, Alaska

Performed site assessment and monitoring activities at various locations along the Trans Alaska Pipeline System. Responsibilities included geotechnical investigations, soil gas probe installation, soil and water sampling and other activities. These tasks served the purpose of better defining or assessing contamination plumes within soil and/or water mediums.

Cristina F. Brischler

POSITION

Vice President

EDUCATION

B.S. Environmental Sciences, University of Massachusetts, Amherst

M.S. Environmental & Emergency Management, Arizona State University

PROFESSIONAL DESIGNATION

- Hazardous Waste Operations and Emergency Response Supervisor
- AHERA-Certified Asbestos Building Inspector
- AHERA-Certified Asbestos Contractor/Supervisor
- EPA-Certified Lead Paint Inspector
- Environmental Professional

PROFESSIONAL ASSOCIATION

- WTS, SW Idaho Chapter, Communications Chair
- American Council of Engineering Companies of Idaho, Environmental Committee

PROFESSIONAL EXPERIENCE

Ms. Brischler is a senior environmental scientist and professional with project experiences throughout the Western U.S. She has more than 20 years' experience conducting asbestos and lead-based paint building inspections and abatement oversight, mold sampling and remediation oversight, Phase I/II/III ESAs, remedial actions, vapor intrusion assessments, air permitting, groundwater modeling, hazardous waste characterization and manifesting, and UST closures. Ms. Brischler has managed multiple Brownfields, Voluntary Cleanup Program (VCP), and LUST sites for Idaho DEQ.

Ms. Brischler works closely with clients to limit environmental investigation costs and ensure favorable regulatory outcomes on projects, including no further action (NFA) and clean closures without regulatory restrictions or covenants for the property. Ms. Brischler has worked on a wide range of private, municipal, and commercial properties, including dry cleaners, oil production sites, gas stations, restaurants, hospitals, K-12 schools and universities, train depots, correctional facilities, aviation crash sites, clandestine laboratories, clean rooms, shooting ranges, and court facilities.
