1.0 EXECUTIVE SUMMARY.....

Planet Protection Services performed a Phase 1 Environmental Site Assessment (ESA) of the property currently owned by Old Peacock, Inc. The Property is located at 231 S. Colorado Street, Salem, Virginia. Transfer of ownership is the result of evaluating potential environmental concerns at the property, which will be acquired as part of the new owner.

The Purpose of the Phase 1 Environmental Site Assessment (ESA) is to screen the prospective site for visible or documented environmental contamination and current or historic site operations that may result in significant risk of surface or subsurface contamination. This ESA was performed in general accordance with the American Society for Testing and Materials (ASTM) Standard for Phase 1 Environmental Site Assessments (ASTM E1527).

There is no Recognized Environmental Conditions identified for the site.

Planet Protection Services surveyed the building materials present and found suspect asbestos materials with in the building. There is paint left within or on the structure but due to the age of the building some lead may be present within the existing paint.

There are no known activity use limitations or environmental liens on the subject property, and no records were found of current or past environmental regulatory enforcement actions or cleanup or remediation activities. The property has municipal utilities (water, sewer and gas).

As a result of this study, we find that there is no observable evidence of a release of petroleum or hazardous materials from the site into the environment. There are no signs of spills, releases or illegal dumping or disposal on the property or nearby and there are no adverse odors, stressed vegetation, unusual mounds or other indicators of an environmental impact on or around the site. We conclude that there are no significant environmental liabilities associated with the property.

2.0 INTRODUCTION.....

The Phase I Environmental Site Assessment (Phase I ESA) prepared by Planet Protection Services for Peacock Salem, LLC located at 231 S. Colorado Street, Salem, Virginia. This Phase I ESA was performed in accordance with the standards set forth in ASTM E1527-05 and the following Scope of Work Summary.

2.1 Purpose

The purpose of the Phase I Environmental Site Assessment (ESA) was to evaluate the current and historical conditions of the Subject Property in an effort to identify recognized environmental conditions in connection with the Subject Property.

Recognized Environmental Condition (REC) is defined by ASTM as:

Recognized Environmental Condition – *“The presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substance or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions”*

2.2 Detailed Scope-of-Services

The Phase I ESA conducted at the Subject Property was in general accordance with ASTM Standard E1527-05 and included the following:

- Field observations made during a site and area reconnaissance performed on December 28, 2016.
- Review of readily available historical documents, including aerial photographs, topographic maps, and tax assessment records.
- Review of title records and search for environmental cleanup liens
- Review of federal, state, and local environmental regulatory databases. The search distances are those specified as minimum search distances in ASTM Standard E 1527-05.

Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. These activities would be carried out in a Phase II ESA, if required. This Scope does not include services associated with Phase II of an Environmental Site Assessment.

2.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM Standard Practice ASTM E 1527 to insure that methodologies used constitute appropriate inquiry into the prior uses of the property consistent with good commercial and customary practice in order to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with a property.

Performance, in accord with these standards is intended to reduce, but not eliminate uncertainty with respect to the potential for RECs associated with a property.

This report is designed to satisfy the requirements for the innocent landowner defense to CERCLA liability as defined in 42 USC 9601 (34) B.

All of the investigative reports as stated in ASTM subject have been satisfied by this assessment

2.4 Limitations and Exceptions

Along with all of the limitations set forth in various sections of the ASTM E 1527-05 protocol, the accuracy and completeness of this report may be limited by the following:

Access Limitations - None

Physical Obstructions to Observations - None

Outstanding Information Requests - None

Historical Data Source Failure - None

Other – Limited interviews were conducted as part of this ESA

It should be noted that this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist on the property. Where required, the documents listed in Appendices A thru E were used as reference material for the completion of the Phase I ESA. Some of the information presented in this report was provided through existing documents and interviews. Although attempts were made, whenever possible, to obtain a minimum of two confirmatory sources of information, Planet Protection Services in certain instances has been required to assume that the information provided is accurate.

The information and conclusions contained in this report are based upon work undertaken by trained professional and technical staff in accordance with generally accepted engineering and scientific practices current at the time the work was performed. The conclusions and recommendations presented represent the best judgment of Planet Protection Services based on the data obtained from the work. Due to the nature of investigation and the limited data available, Planet Protection Services cannot warrant against undiscovered environmental liabilities. Conclusions and recommendations presented in this report should not be construed as legal advice.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

2.5 Special Terms and Conditions

All information was presumed to be correct and accurate as presented. The findings of Planet Protection Services assessment are based on observations of existing conditions at the site and surrounding areas by qualified personnel at the time of our site visit. This assessment was conducted on behalf of, and for the exclusive use of the Client, identified herein, and is intended solely as a Phase 1 Environmental Site Assessment of the subject Site.

2.6 User Reliance

This report has been prepared for Peacock Salem, LLC for the sole benefit of the client and their designated representatives. Use of this report by another party is not authorized and will be at such party's own risk. Planet Protection Services disclaims liability for use or reliance on this report by other parties without obtaining prior written consent.

3.0 SITE DESCRIPTION.....

3.1 Locations and Legal Description

TARGET PROPERTY INFORMATION

ADDRESS(s):
231 S. Colorado Street
Salem, Virginia

RESEARCH SOURCE:
Source: Roanoke County Assessor
Roanoke County Clerk

DEED INFORMATION:
Type of Instrument: Deed
Title is vested in: 231 S. Colorado Street
Title received from: Roanoke County Clerk's Office

Deed Dated: 2/27/1960
Deed Recorded: 2/27/1960 DB 636 Pg. 419
Instrument: Not Available
Property Identifiers: Lot 1, Block 6 in Plat Book 4, Page 7

A copy of the tax parcel descriptions, legal description and the deeds associated with recent transfers are included in Appendix A. Also included in Appendix A is a copy of the most recent survey plat for the property.

The property is zoned Commercial/Industrial -20C

A search for environmental liens indicates there is none found to be recorded against the site. A title report for the property is included in Appendix A.

3.2 Site and Vicinity General Characteristics

The property is currently vacant dry cleaners shop. North West of the property lays Shutts & Kiser Associates, PC and Shiloh Baptist Church. South of the property is the Our Health Magazine, Attorneys Osterholt, Prillard, Natt Helser and Yost, and one residential house. East of the property lays Joe's Deli, Salyer Garage, and one service station.

The earliest development of the Site appears to be in 1922 whereby the owner was Salem Steam Cleaners. Then in 1960 between John L. Logan and Joseph D Logan partners trading under Peacock Cleaners. Then turned into Peacock-Salem Launderers and Cleaners.

The property does not lie within a 500 year FEMA Federal flood zone and there are no adjacent National Wetlands. The property does lie on the edge of a 100- year flood zone. There are no records to indicate that the property is within close proximity of any coal sites.

The predominant use of the immediate neighborhood is primarily commercial/retail and office buildings with residential properties in the rear of the property. There are no heavy industrial or coal sites surrounding the property. The adjoining and surrounding sites usage is commensurate to that of the subject Site.

There are no surface water bodies on the Property. Surface drainage occurs via street flow into curb inlets and the city storm sewer system.

The Property is located in an area of commercial and residential development.

3.3 Current Use of the Property

The Property is not being used.

3.4 Descriptions of Structure, Roads, Other Improvements on the Site (including heating /cooling system, sewage disposal, source of potable water)

The Property consists of approximately 0.65 acres. The Property is developed at 231 S. Colorado Street, and contains one building measuring about 24,644 sq. ft.

The building is brick and block construction. The foundation is concrete slab-on-grade with block masonry walls. The exterior walls are brick and the roof is combination flat and pitched roof. The building's heating and cooling is forced air HVAC units (office area only).

The remaining portion of the Property consists of primarily limited landscaping.

3.5 Current Uses of the Adjoining Properties

The predominant use of the immediate neighborhood is primarily commercial properties. All other properties surrounding the Site have been commercial in nature with businesses ranging from light manufacturing to retail stores.

The overall surrounding properties site usage is commensurate to the subject Site. During the site reconnaissance, Planet Protection Services identified the following properties in the immediate vicinity:

Directions From Site	Development Type	Use or Property
North	Commercial	Business
East	Commercial	Service Stations
South	Commercial	Business/Retail Offices
West	Commercial	Business/Church

The current use of the adjoining properties was identified through a visual survey of the surrounding area. The Subject Site is located in a commercial use area. Adjoining property based on the area reconnaissance, no adverse environmental impacts to the Subject Site are anticipated from surrounding properties.

4.0 USER PROVIDED INFORMATION.....

4.1 Title Records

Review of chain-of-title information is included in the scope of work for this project. No environmental concerns were identified with historical ownership of the Property. No environmental liens were identified.

4.2 Environmental Liens or Activity and Use Limitations

An environmental lien review was collected in conjunction with this investigation. There are no known environmental liens or activity and use limitations on the subject property.

4.3 Special Knowledge

No specialized knowledge in connection with the subject property was identified by the user/client. Planet Protection Services only knowledge of the subject Site is contained herein.

4.4 Commonly Know or Reasonably Ascertainable Information

Planet Protection Services was not provided with any commonly known or reasonably ascertainable information about the Property that is material to recognized environmental conditions in connection with the Property.

4.5 Valuation Reduction for Environmental Issues

No environmental issues were identified by the user/client that could result in property value reduction. This assessment does not include controlled or regulated building materials that may require specialized handling, such as asbestos containing materials or lead-based paint.

4.6 Owners, Property Manager and Occupant Information

Old Peacock Inc. currently owns the Property. The Property is currently vacant no further information has been provided.

4.7 Reason for Performing Phase I

This Phase I ESA is being conducted as part of environmental due diligence prior to property transfer.

Planet Protection Services prepared this Phase I ESA and report at the request of the Client. The ESA was requested for one or more of the following reasons:

- Assist in the determination whether any immediate actions at the Property are necessary to comply with existing environmental laws and regulations.
- Assist in the evaluation of legal and financial liabilities associated with the Property.
- Assist in the evaluation of the Property's overall development potential.
- Constitute partial or whole appropriate inquiry for purposes of CERCLA's innocent landowner defense.

4.8 Other

The user has not made known to the environmental professional any other reason why the user wants to have this Phase I Environmental Site Assessment performed other than the user's desire to qualify for an LLP to CERCLA liability.

5.0 RECORDS REVIEW.....

5.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) conducted a search of available federal and state environmental records. The EDR Radius Report with GeoCheck (Report) for the Property is included in Appendix B Regulatory Records Documentation of this report. The provided report meets or exceeds the regulatory record search requirements of ASTM E1527-05

The subject Property was not listed in any of the databases searched by EDR

A summary of the information provided is in the EDR Report. Unless described in one or more of the following sections, the unmapped facilities identified in the EDR Report are either located beyond the prescribed search radii or cannot be located because of insufficient addresses.

A copy of the EDR database report is presented in its entirety in Appendix B. Additionally, explanations of the content of the databases are provided directly within the EDR report.

- ◆ National Priorities List (NPL) and Proposed NPL sites;
- ◆ Comprehensive Environmental Response, Compensation, and Liability Information System Report (CERCLIS);
- ◆ CERCLIS No Further Remedial Action Planned Report (CERCLIS-NFRAP);
- ◆ Resource Conservation and Recovery information System (RCRIS) Treatment, Storage, and Disposal (TSD) Facilities Report, Large Quantity Generators (LQG) Report, and Small Quantity Generators (SQG) Report;
- ◆ RCRIS TSDs subject to Corrective Action Report (CORRACTS);
- ◆ Emergency Response Notification System (ERNS); and Supplemental federal databases reported by EDR.

State and Local Regulatory Record Sources

Current state and local regulatory records were reviewed to assist in identifying potential recognized environmental conditions in connection with the Subject Site or nearby properties.

Records were obtained through EDR, the database search was performed in accordance with the database search was performed in accordance with ASTM for the following state databases:

- ◆ State Hazardous Waste Sites (SHWS) report;
- ◆ State Solid Waste Landfill (SWL) list;
- ◆ State Underground Storage Tank (UST) report and Aboveground Storage Tank (AST) report;
- ◆ State Leaking Underground Storage Tank (LUST) database; and
- ◆ State ASTM Supplemental Records.

The state and local regulatory records search was performed in accordance with the ASTM E 1527-05 standard (with respect to the databases searched and the search radii). A copy of the EDR report is included as Appendix B.

Database List	Subject Property	Total Number of Listings	Environmental Concern Posed to Subject Property
RCRA-SQG (0.25 MILES)	NO	1	NO
RCRA-CESQG (0.25MILES)	NO	2	NO
LUST (0.50 MILES)	NO	10	NO
LTANKS (0.50 MILES)	NO	16	NO
UST (0.25 MILES)	NO	9	NO
AST (0.25 MILES)	NO	0	NO
INST CONTROL (0.5 MILES)	NO	0	NO
VCP (0.25 MILES)	NO	0	NO
RCRA-NonGen (0.25 MILES)	NO	4	NO
SEMS – ARCHIVE (.5 miles)	NO	1	NO
EDR Hist Auto (.125 miles)	NO	6	NO
DRY CLEANERS (.25 MILES)	NO	1	NO
SWF-LF (.5 MILES)	NO	1	NO

5.2 Additional Environmental Record Sources

In addition to the database review, no local and/or state agencies were contacted and questioned with regard to any environmental issues related to the site or adjoining properties. EDR’s GEOCHECK Physical setting map findings indicate available EPA Region 3 list statistical summary readings of radon gas at maximum levels of 7.1 picoCuries to 0.4 picoCuries per liter of air for the Site property at zip code 24153. EPA regulatory standard for radon gas is 4 picoCuries per liter of air.

5.3 Physical Setting Source(s)

The following sources were used to characterize the physical setting of the site:

- USGS 7.5 Digital Elevation Model (DEM) Model in 2002 and updated it in 2006.
- GIS Information developed by County of Roanoke Virginia.
- Soil Survey map information from USDA Soil Conservation Service, STATSGO data
- FEMA Flood Insurance Rate Map

5.4 Historical Use Information on the Property

Historical information identifying the subject site use was obtained from a variety of sources as detailed in Appendix C of this report and included: City Directories, Aerial Photographs, Sanborn Fire Insurance Maps, Topographic Maps, and other historical information.

There were no unusual entries, which would bear further investigation.

A 50 Year- Chain –of-Title was collected of the subject Site. There were minimal changes in ownership throughout the selected period.

City directories have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth century directories are generally divided into three sections: a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be spotty for rural areas and small towns. ASTM E 1527 specifies that a "review of city directories (standard historical sources) at less than approximately five year intervals is not required by this practice." (ASTM E1527).

Planet Protection Services reviewed city directories for the subject and adjoining properties provided by EDR Inc. that covered the years 1960 through present. The subject property address was first listed in: Roanoke County GIS System in 1922.

ASTM E 1527-3.3.3 aerial photographs--photographs taken from an airplane or helicopter (from a low enough altitude to allow identification of development and activities) of areas encompassing the property. Aerial photographs are often available from government agencies or private collections unique to a local area. Area coverage was available for the following years: 1968, 1970, 1977, 1982, 1990, 1996, 2000, 2005, 2006, 2009, 2011 and 2012

Sanborn Maps are fire insurance archive maps that date back to the late 1800's. These maps are a useful tool for the environmental professional to determine the building and prior use of a target and surrounding properties. Based on EDR-supplied information, fire insurance maps for the following years were identified: 1886, 1891, 1898, 1903, 1908, 1913, 1922, 1932 and 1959

5.5 Historical Use Information on Adjoining Properties

Properties surrounding the Site have been commercial properties used for several different businesses throughout the years. Several light manufacturing and service station properties are still present to date. No information has been gathered to suspect hazardous materials have been present in or around the Site.

6.0 SITE RECONNAISSANCE.....

6.1 Methodology and Limiting Conditions

David Harvey of Planet Protection Services conducted the site reconnaissance on December 28, 2016. The inspector was accompanied during the site reconnaissance with its representative, Mr. Nathan Vaught. Weather conditions at the time of the site reconnaissance were clear and warm. The visual reconnaissance consisted of observing the boundaries of the property and systematically traversing the site to provide an overlapping field of view, wherever possible. The periphery of the on-site structure was observed along with interior accessible common areas, manufacturing, and storage and maintenance areas.

6.2 General Site Setting

The subject parcel is flat at the front and at the rear and the building takes up the whole parcel. The streets at the front are asphalt paved. Storm sewers are present in surrounding streets. The buildings are clearly connected to the local water supply and sanitary sewer system.

6.3 Exterior Observations

The following exterior observations were made during the site reconnaissance:

- Roof drains discharge at grade or below grade to buried storm sewers.
- The building is brick/block construction, single-story structure.
- There are no vent pipes or oil storage tanks on or around the buildings.
- There are no exterior tanks, in-ground monitoring wells, or other evident process features on-site such as an oil-water separator.
- There are no signs of petroleum, gasoline or hazardous material storage on-site.
- There are no signs of spills or releases on the property.
- There is no storage or debris outside the buildings.
- There are no signs of the use, handling, storage or disposal of hazardous materials on the site.
- There are no unlabeled drums or containers on the property.
- There is no suspicious insulation or fuel present.

6.4 Interior Observations

The following interior observations were made during the site reconnaissance:

- The building is vacant at the present time.
- There are no tanks or other features inside the buildings that may present an environmental concern.
- There are no signs of the use, handling, storage or disposal of hazardous materials inside the building or around the building.

7.0 INTERVIEWS.....

Limited interviews were conducted as part of this ESA the findings and conclusions of this ESA are based on the scope of work, including limited visual observations, data and records reviews, and historical information obtained to date. A potential always remains for the presence of unknown, unidentified, or unforeseen surface or subsurface contaminations.

Name	Organization or Agency	Telephone Number
Nathan Vaught	Owner /Representative	540-797-2344
	Clerks Office	540-387-6205
	Roanoke GIS	540-772-2086
Larry Dwyer	Environmental Data Resources, Inc.	866-783-3704

8.0 FINDINGS.....

The following findings and opinions were derived from Planet Protection Services assessment of the Property located at 231 S Colorado Street, Salem, Virginia.

The site contains a single brick /block building, on 0.65 acres, built in 1900's and added on to years after that according to city records. The property is located in a largely commercial area with some office area uses nearby. The historic use of the site has been a dry cleaning company.

A review of city directories for the Property from 1922 to 2016 did not identify usage of the Property or adjoining sites that are considered evidence of an REC or a potential REC.

A review of aerial photographs for the Property from 1968 to 2012 did not identify usage of the Property or adjoining sites that is considered evidence of an REC or a potential REC.

9.0 OPINION.....

Based on the results of the assessment, no environmentally related conditions, including no RECs, Historical RECs, or de minimus conditions, were identified in connection with subject site.

10.0 CONCLUSIONS.....

Planet Protection Services performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. The assessment has revealed that there are no recognized environmental conditions associated with the site.

11.0 DEVIATIONS.....

A data gap is defined by ASTM E 1527-05 as a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from the incompleteness in any of the activities required by this practice including, but not limited to, the site reconnaissance, interviews, and historical research. Failure to achieve the historical research objectives identified in the standard is termed a data failure and is a type of data gap.

Data Gap- Limited Interviews

12.0 ADDITIONAL SERVICES.....

None

David E. Harvey
Environmental Professional

15.0 QUALIFICATION(s) of ENVIRONMENTAL PROFESSIONAL(s).....

The following individual was involved in the preparation of this Phase I ESA:

David E. Harvey
Environmental Professional /Project Manager

Education: B.S. Science, Ferrum College – Ferrum, Virginia, 1985

US EPA AHERA Asbestos Inspector
Virginia Accredited Asbestos Inspector
Virginia Asbestos Project Designer
Virginia Asbestos Project Monitor
Virginia Asbestos Abatement Supervisor
Virginia Asbestos AIHA Laboratory
West Virginia Asbestos Project Designer
West Virginia Asbestos Air Laboratory
West Virginia Accredited Asbestos Inspector
NIOSH 582e

Qualifications & Professional Experience

David E Harvey has been in the environmental consulting profession since 1987. Since then, he has been responsible for program and project management of multi-disciplinary environmental consulting services. David has extensive experience managing programs that involve multiple task orders requiring the management, coordination and direction of several project personnel and subcontractors in accordance with designated plans and specifications. David’s project experience includes environmental site assessments, asbestos inspections and abatement design, underground storage tank (UST) assessments, environmental drilling and site remediation, industrial hygiene assessments, OSHA compliance and property condition reporting.

David was responsible for technical report reviews, development of statements of work for conducting environmental services, and interaction with numerous regulatory agencies in various states and cities throughout the country. David’s experience and knowledge continue to keep him involved in environmental projects throughout the nation.

THIS DEED made and entered into this the 27th day of FEBRUARY, 1960, by and between JOHN L. LOGAN and JOSEPH D. LOGAN, partners doing business and trading under the name of Peacock-Salem Launderers and Cleaners, parties of the first part, and PEACOCK-SALEM LAUNDERERS & CLEANERS, INC., a Virginia Corporation, party of the second part.

: W I T N E S S E T H :

That for and in consideration of the sum of ONE (1.00) DOLLAR cash in hand paid by the party of the second part unto the parties of the first part, and other good and valuable considerations, the receipt of all of which is hereby acknowledged, the said parties of the first part do grant and convey, with covenants of General Warranty of Title, unto the party of the second part, all those two certain tracts or parcels of land, situate in the Town of Salem, Roanoke County, Virginia, and described as follows:

TRACT NO. 1

BEGINNING at a point where the East line of Alabama Street intersects the North line of First Street; thence with the North line of First Street, North 79° 45' East, 265 feet to a point where the North line of First Street intersects the West line of Colorado Street; thence with the West line of Colorado Street, North 10° 15' West, 124.7 feet to a point where the West line of Colorado Street intersects the southwest line of Boulevard-Roanoke; thence with the southwest line of Boulevard-Roanoke, North 53° 35' West, 15 feet to a point; thence leaving Boulevard-Roanoke and with the property of Robert Elwood Owen and Margaret B. Owen, South 59° 25' West, 96.67 feet to a point; thence still continuing with the Owen property, North 89° 19' West, 99.23 feet to a point; thence with the Esther S. Thornton property and continuing on the same course, 43.16 feet to a point in the East line of Alabama Street, marked by an iron pipe; thence with the East line of Alabama Street, South 0° 41' West, 131.34 feet to the place of BEGINNING.

TRACT NO. 2

All that certain lot or parcel of land situate on the West side of Alabama Street and North of First Street; and described as follows:

BEGINNING at a point where the North line of First Street intersects the West line of Alabama Street; thence with the West line of Alabama Street, North 0° 45' West, 76.40 feet to a point in the West line of Alabama Street; thence leaving the West line of Alabama Street, and with a new division line through the property known as the Salem Folding Chair lot, South 78° 05' West, 185.5 feet to a point in the East line of White Oak Street; thence with the East line of White Oak Street, South 11° 55' East, 75 feet to a point where the East line of White Oak Street intersects the North line of First Street; thence with the North line of First Street, North 78° 05' East, 170.8 feet to the place of BEGINNING; and,

Being the same tracts or parcels of land as were conveyed to the parties of the first part, partners doing business under the name of Peacock-Salem Launderers and Cleaners, by John L. Logan and Marjorie W. Logan, his wife, by deed dated January 1, 1957, and recorded May 28, 1957, beginning on Page 378, of Deed Book 574, of the records of the Clerk's Office of the Circuit Court of Roanoke County, Virginia, reference to which deed book and page is herein specifically had.

The parties of the first part covenant that they have the right to convey the said real estate unto the party of the second part; that they have done no act to encumber the same; that the party of the second part, its successors and assigns, shall have the quiet and peaceable possession and enjoyment thereof, free from the claims and demands of all parties, and that they, the said parties of the first part, will execute such other and further assurances as to the title thereto as may be requisite.

WITNESS the following signatures and seals.

John L. Logan (SEAL)

Joseph D. Logan (SEAL)
Partners doing business and trading
under the name of Peacock-Salem
Launderers & Cleaners, Inc.

STATE OF VIRGINIA
COUNTY OF ROANOKE, to-wit:

I, Juanita F. Brandt, a Notary Public in and for the County of Roanoke, in the State of Virginia, do hereby certify that John L. Logan and Joseph D. Logan, partners doing business

KIME & JOLLY
ATTORNEYS AT LAW
SALEM, VA.

and trading under the name of Peacock-Salem Launderers and Cleaners, whose names, as such, are signed to the foregoing deed, bearing date on the 27th day of February, 1960, have, each of them, personally appeared before me and acknowledged the same in my said County and State aforesaid.

GIVEN under my hand this 27th day of February 1960.

My commission expires June 21, 1961.

Sumner F. Bennett

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SALEM CY LANDFILL	OFF ROWE ST	NW 1/4 - 1/2 (0.255 mi.)	J35	64

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

SALEM FAST SERVICE S	30 W MAIN ST	WNW 1/8 - 1/4 (0.235 mi.)	I33	62

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Management Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Quality's Permitted Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 09/10/2015 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Underground Storage Tank Data Notification Information.

A review of the UST list, as provided by EDR, and dated 08/02/2016 has revealed that there are 9 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that

EXECUTIVE SUMMARY

there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CEDS (Virginia - Comprehensive Environmental Data System) is the Department of Environmental Quality's (DEQ) electronic data system for maintaining databases on sources of pollutants in all media.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CEDS (Virginia - Comprehensive Environmental Data System) is the Department of Environmental Quality's (DEQ) electronic data system for

maintaining databases on sources of pollutants in all media.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site Specific Assessments

To qualify for Brownfields Assessment, the site must meet the Federal definition of a Brownfields and should have contaminant issues that need to be addressed and a redevelopment plan supported by the local government and community. Virginia's Department of Environmental Quality performs brownfields assessments under a cooperative agreement with the U.S. Environmental Protection Agency at no cost to communities, property owners or, prospective purchasers. The assessment is an evaluation of environmental impacts caused by previous site uses similar to a Phase II Environmental Assessment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

	Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2012	Source: EPA
Date Data Arrived at EDR: 01/15/2015	Telephone: 202-260-5521
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 12/23/2016
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2017
	Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2014	Source: EPA
Date Data Arrived at EDR: 11/24/2015	Telephone: 202-566-0250
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 11/22/2016
Number of Days to Update: 133	Next Scheduled EDR Contact: 03/06/2017
	Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/25/2013	Source: EPA
Date Data Arrived at EDR: 12/12/2013	Telephone: 703-416-0223
Date Made Active in Reports: 02/24/2014	Last EDR Contact: 12/06/2016
Number of Days to Update: 74	Next Scheduled EDR Contact: 03/20/2017
	Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

	Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

	Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PEACOCK SALEM LLC
231 S COLORADO STREET
SALEM, VA 24153

TARGET PROPERTY COORDINATES

Latitude (North):	37.290603 - 37° 17' 26.17"
Longitude (West):	80.055773 - 80° 3' 20.78"
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	583695.9
UTM Y (Meters):	4127324.5
Elevation:	1038 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5950461 SALEM, VA
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

51161C0143G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SALEM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Wheeling

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 4	Max: 6 Min: 5.1
2	11 inches	70 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 6 Min: 5.1
3	70 inches	74 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AREA RADON INFORMATION

EPA Region 3 Statistical Summary Readings for Zip Code: 24153

Number of sites tested: 512.

Maximum Radon Level: 81.3 pCi/L.

Minimum Radon Level: 0.4 pCi/L.

pCi/L <4	pCi/L 4-10	pCi/L 10-20	pCi/L 20-50	pCi/L 50-100	pCi/L >100
376 (73.44%)	110 (21.48%)	22 (4.30%)	3 (0.59%)	1 (0.20%)	0 (0.00%)

Federal EPA Radon Zone for SALEM County: 1

- Note: Zone 1 indoor average level > 4 pCi/L.
 : Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
 : Zone 3 indoor average level < 2 pCi/L.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EPA Region 3 Statistical Summary Readings

Source: Region 3 EPA

Telephone: 215-814-2082

Radon readings for Delaware, D.C., Maryland, Pennsylvania, Virginia and West Virginia.
