DESCRIPTION

This offering consists of 153.60 +/- acres of open farmland with 100% Class 1 soil and water supplied via one (1) 200HP irrigation well in Arvin-Edison Water Storage District

LOCATION

Property is located at southwest corner of the intersection of Bear Mountain Blvd and Tower Line Road to the east of the City of Arvin and County of Kern

LEGAL/ZONING

Kern County Assessor Parcel Number(s): 193-120-01; 193-120-02; Portion(s) of the Southeast ¼ of Section 25; Township 31 South; Range 29 East; MDB&M

SOIL

100% - (144) Hesperia sandy loam, 0 to 2% slope, Class 1 - Excellent

WATER

Property is located within the boundaries of Arvin-Edison Water Storage District (AEWSD) with no contract of service and is subject to an annual General Administrative and Project Service Charge of \$155.57 per acre that is billed by AEWSD and collected via the Kern County Assessor 2025-2026 tax roll. Irrigation water is supplied to the property via one (1) 200HP irrigation well with a reported flow of 1,530 GPM, standing water level at 349 feet, pumping water level at 367.50 feet, and overall pump efficiency of 66.54% as reported via a pump test dated March 5th, 2026

LEASE

Property is being sold subject to Agricultural Lease that expires on December 31st, 2027

SGMA

The Sustainable Groundwater Management Act passed in 2014, and requires groundwater basins to be sustainable by 2040 with Groundwater Sustainability Plans (GSP) in place by 2020. GSP(s) may limit the amount of well water pumped, and Buyers are encouraged to consult with a professional regarding the impacts of SGMA and possible limitations to the amount of groundwater that may be pumped. For more information go to <https://water.ca.gov/Programs/Groundwater-Management/SGMA-Groundwater-Management>

PRICE

\$2,150,400.00 (\$14,000 per acre) with all cash proceeds to be paid at closing

SOIL MAP

California Revised Storie Index (CA) - Summary by Map Unit - Kern County, California					
Map Unit Symbol	Map Unit Name	Rating	Component	Acres	Percent
144	Hesperia sandy loam, 0 to 2 percent slopes	Grade 1 Excellent	Hesperia (85%)	160.8	100.0%
Totals for Area of Interest				160.8	100.0%

The Revised Storie Index is a rating system based on soil properties that govern the potential for soil map unit components to be used for irrigated agriculture in California.

The Revised Storie Index assesses the productivity of a soil from the following four characteristics:

- Factor A: degree of soil profile development
- Factor B: texture of the surface layer
- Factor C: steepness of slope
- Factor X: drainage class, landform, erosion class, flooding and ponding frequency and duration, soil pH, soluble salt content as measured by electrical conductivity, and sodium adsorption ratio

Revised Storie Index numerical ratings have been combined into six classes as follows:

- Grade 1: Excellent (81 to 100)
- Grade 2: Good (61 to 80)
- Grade 3: Fair (41 to 60)
- Grade 4: Poor (21 to 40)
- Grade 5: Very poor (11 to 20)
- Grade 6: Nonagricultural (10 or less)

The components listed for each map unit in the accompanying Summary by Map Unit table in Web Soil Survey or the Aggregation Report in Soil Data Viewer are determined by the aggregation method chosen. An aggregated rating class is shown for each map unit. The components listed for each map unit are only those that have the same rating class as the one shown for the map unit. The percent composition of each component in a particular map unit is given to help the user better understand the extent to which the rating applies to the map unit.

Other components with different ratings may occur in each map unit. The ratings for all components, regardless the aggregated rating of the map unit, can be viewed by generating the equivalent report from the Soil Reports tab in Web Soil Survey or from the Soil Data Mart site. On-site investigation may be needed to validate these interpretations and to confirm the identity of the soil on a given site.
